

Learn Beyond

**KPR Institute of  
Engineering and  
Technology**

(Autonomous, Affiliated to Anna University)

# **CURRICULUM AND SYLLABI REGULATIONS – 2025 (REVISED)**

Department of  
Information Technology

**I. Vision and Mission of the Institute****Vision**

To become a premier institute of academic excellence by imparting technical, intellectual and professional skills to students for meeting the diverse needs of industry, society, the nation and the world at large

**Mission**

- Commitment to offer value-based education and enhancement of practical skills
- Continuous assessment of teaching and learning processes through scholarly activities
- Enriching research and innovation activities in collaboration with industry and institutes of repute
- Ensuring the academic processes to uphold culture, ethics and social responsibilities

**II. Vision and Mission of the Department****Vision**

To become a potential innovation cluster in Information Technology for offering quality education, research and professional skills to meet the global requirements.

**Mission**

The mission of the department is to

- Empower students with innovative teaching learning processes that meets the dynamic requirements of the industries
- Encourage collaborative research and industry-institute interactions to cater the global needs
- Create ethically strong and socially responsible professionals with high competency

**III. Program Educational Objectives (PEOs)**

The Program Educational Objectives (PEOs) of the INFORMATION TECHNOLOGY (IT) represent major accomplishments that the graduates are expected to achieve after three to five years of graduation.

- PEO1:** Excel in their professional roles and higher studies by implementing the knowledge acquired in information technology with lifelong learning
- PEO2:** Design and implement Information Technology based solutions and services to solve the industrial and societal problems
- PEO3:** Exhibit communication skills, leadership virtues, professional and ethical values in professional domains

**IV. Program Outcomes (POs)**

Graduates of the INFORMATION TECHNOLOGY will be able to

- PO1:** Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems
- PO2:** Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development (WK1 to WK4)
- PO3:** Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required (WK5)
- PO4:** Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions (WK8)

- PO5: Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems (WK2 and WK6)
- PO6: The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment (WK1, WK5, and WK7)
- PO7: Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws (WK9)
- PO8: Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams
- PO9: Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
- PO10: Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments
- PO11: Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change (WK8)

#### Knowledge and Attitude Profile (WK)

- WK1: A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences
- WK2: Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline
- WK3: A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline
- WK4: Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline
- WK5: Knowledge, including efficient resource use, environmental impacts, whole-life cost, re-use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area
- WK6: Knowledge of engineering practice (technology) in the practice areas in the engineering discipline
- WK7: Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development
- WK8: Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues
- WK9: Ethics, inclusive behavior and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes

#### V. Program Specific Outcomes (PSOs)

Graduates of the INFORMATION TECHNOLOGY will be able to

- PSO1: Identify and apply appropriate IT integrated tools and techniques to build projects and services in networking, computing and data security.
- PSO2: Design and develop IT enabled solutions and services for catering the broader societal needs

## VI. PEO / PO Mapping

Following three levels of correlation should be used:

- 1: Low  
2: Medium  
3: High

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| PEO 1      | 3   | 3   | 3   | 3   | 3   | 2   | 2   | 2   | 2   | 2    | 3    | 3    | 3    |
| PEO 2      | 3   | 3   | 3   | 3   | 3   | 3   | 2   | 2   | 2   | 3    | 2    | 3    | 3    |
| PEO 3      | 2   | 2   | 2   | 2   | 1   | 1   | 3   | 3   | 3   | 2    | 2    | 2    | 2    |

## VII. Mapping of Course Outcomes (COs) with Program Outcomes (POs)

| Sem | Course Title                                               | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|-----|------------------------------------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|

## COURSE OBJECTIVES:

- To develop professional communication skills for academic, technical and workplace environments
- To enhance the listening skills and facilitate effective pronunciation
- To enable students to communicate confidently in individual and team-based situations

## COURSE OUTCOMES:

|                                                                                                   |            |
|---------------------------------------------------------------------------------------------------|------------|
| CO 1: Use appropriate vocabulary and grammatical structures in professional communication         | Understand |
| CO 2: Communicate confidently in academic, social and workplace situations                        | Apply      |
| CO 3: Develop reading and writing skills for technical and professional purposes                  | Apply      |
| CO 4: Infer and present information using appropriate communication strategies                    | Analyze    |
| CO 5: Demonstrate effective listening, presentation, and teamwork skills in professional contexts | Apply      |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|

## SYLLABUS:

## UNIT I: FOUNDATIONS OF PROFESSIONAL COMMUNICATION

6 + 6

Verbal, Non-verbal and Digital Communication - Word chain - Professional Etiquette - Self-Introduction and Elevator Pitch - Growth Mindset and Workplace Communication - Cross-cultural Communication - Professional Terminology - AI-assisted Communication Tools

## UNIT II: PROFESSIONAL READING AND WRITING

6 + 6

Reading Technical Articles - Error correction - Manuals and SOPs - Infographics and Data - Email Etiquette - Email Writing - AI-assisted Writing Tools - Ethical Use of AI - Verbal Analogy

## UNIT III: LISTENING AND INTERPERSONAL COMMUNICATION

6 + 6

Listening Barriers - Note-taking Techniques - Listening for Problem Solving - Team Communication - Conflict Resolution - Workplace Discussions - Idioms and Phrases

**UNIT IV: DIGITAL COMMUNICATION AND PRESENTATION SKILLS**

6 + 6

Storytelling Techniques - Discourse markers, linkers and cohesive devices - Data Presentation - Presentation Anxiety Management - Digital Presentation Platforms - Branding - Commonly Confused Words

**UNIT V: EMPLOYABILITY AND PROFESSIONALISM**

6 + 6

Prefixes, Suffixes and Root Words - LinkedIn Profile - Interview Skills - Group Discussion Strategies - Art of Persuasion - Entrepreneurial Communication - AI in Future Workplace

**LIST OF EXPERIMENTS**

1. Self-Introduction
2. Group Presentation
3. Listening to TED Talks
4. Listening to Documentaries
5. Digital Profiling

**CONTACT PERIODS:**

Lecture: 30 Periods      Tutorial: - Periods      Practical: 30 Periods      Project: - Periods      Total: 60 Periods

**TEXTBOOKS:**

1. Ashraf Rizvi, Effective Technical Communication, 3rd Edition, McGraw-Hill Education, 2023
2. Meenakshi Raman & Sangeeta Sharma, Technical Communication: Principles and Practice, 4th Edition, Oxford University Press, 2022
3. Sanjay Kumar & Pushp Lata, Communication Skills, 3rd Edition, Oxford University Press, New Delhi, 2018

## SEMESTER I

| U25RMA101 | Multivariable Calculus and Applications<br>(Common to all programmes) | Category: BSC |   |   |   |   |
|-----------|-----------------------------------------------------------------------|---------------|---|---|---|---|
|           |                                                                       | L             | T | P | J | C |
|           |                                                                       | 3             | 1 | 0 | 0 | 4 |

## COURSE OBJECTIVES:

- To provide a comprehensive knowledge of multivariable calculus, including, partial derivatives integral calculus, and vector calculus
- For constructing more convenient for students to apply their calculus knowledge to their various fields of study
- To develop skills in solving first and second order linear differential equations for engineering applications

## COURSE OUTCOMES:

- CO 1:** Explain the concepts of multivariable differential calculus, estimate the extreme values and Taylor's Understand formula of two variable functions
- CO 2:** Apply integral calculus to evaluate double integrals over various regions and compute area and volume using double integration Apply
- CO 3:** Apply vector calculus to compute directional derivative, divergence, curl, Green's, Stokes' and Gauss divergence theorems Apply
- CO 4:** Solve first order ordinary differential equations, model physical phenomena, determine appropriate methods for solving them, and interpret the results Apply
- CO 5:** Formulate second-order differential equations, solve the equations, and interpret the solutions for physical models Apply

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |
| CO 2       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |
| CO 3       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |
| CO 4       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 1    |
| CO 5       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 1    |

## SYLLABUS:

## UNIT I: DIFFERENTIAL CALCULUS

9 + 3

Functions of two variables – Partial derivatives – Total derivatives – Taylor's formula for functions of two variables – Extreme Values

## UNIT II: INTEGRAL CALCULUS

9 + 3

UNIT II Double integrals – Over rectangles – Over general regions – Fubini's theorem (statement only), Area and Volume by double integration – Reversing the order of integration

**UNIT III: VECTOR CALCULUS**

9 + 3

Differentiation in vector field – Gradient of a scalar field – Directional derivative – Divergence of a vector field – Curl of a vector field – Integration in vector field – Line integrals – Work– circulation and flux – Path independence – Conservative fields – Green's – Gauss divergence and Stoke's theorems

**UNIT IV: FIRST ORDER LINEAR ORDINARY DIFFERENTIAL EQUATIONS**

9 + 3

Basic concepts of ordinary differential equations – Separable and exact differential equations – Integrating factors and first-order linear differential equations – Mathematical modelling of real-world problems

**UNIT V: SECOND ORDER LINEAR DIFFERENTIAL EQUATIONS**

9 + 3

Homogeneous linear equations of second order – linearity principle – second order homogeneous equations with constant coefficients – Euler–Cauchy equation – Non-homogeneous linear second order-solution by variation of parameters

**CONTACT PERIODS:**

**Lecture:** 45 Periods      **Tutorial:** 15 Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 60 Periods

**TEXTBOOKS:**

|          |                                                                              |               |   |   |   |   |
|----------|------------------------------------------------------------------------------|---------------|---|---|---|---|
| U25RPH02 | Physics for Data Storage and Computing<br>(Common to AD, AM, CB, CS, IT, SC) | Category: BSC |   |   |   |   |
|          |                                                                              | L             | T | P | J | C |
|          |                                                                              | 2             | 0 | 0 | 0 | 2 |

## COURSE OBJECTIVES:

- To understand the concepts of optical and optoelectronic materials and device applications
- To examine the principles and applications of magnetic and nano devices
- To understand the principles of quantum mechanics for computing and electronic circuits and to analyze next generation quantum electronics

## COURSE OUTCOMES:

- CO 1:** Explain the properties and applications of optical materials, optical devices, and optical data storage systems **Understand**
- CO 2:** Describe the behavior of magnetic materials and the working of magnetic storage devices and sensors **Understand**
- CO 3:** Apply the principles of quantum confinement, tunneling, and single electron phenomena in nanodevices **Apply**
- CO 4:** Explain the concepts of quantum computing, qubits, and Bloch sphere representation **Understand**
- CO 5:** Apply the operation of quantum gates, quantum circuits, and quantum devices in quantum computing systems **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |

## SYLLABUS:

## UNIT I: OPTICAL MATERIALS AND DEVICES

6

Classification of optical materials – Carrier generations and recombination process – Absorption, emission and scattering of light in solids – Photodiode – Solar cell – OLED – Optical data storage techniques – Blue ray disc

## UNIT II: MAGNETIC MATERIALS AND DATA STORAGE

6

Origin of magnetic materials – Classification of magnetic materials – Ferromagnetic theory – Hysteresis – Magnetic memory devices – Magnetic tape – GMR Sensor – Magnetic bubble memories – Magstripe

## UNIT III: NANODEVICES

6

Introduction – Quantum confinement – Quantum structures: quantum wells, wires and dots – Band gap of nanomaterials – Tunneling – Single electron phenomena: Coulomb blockade – Single electron transistor – Resonant tunneling diode – Quantum cellular automata

**UNIT IV: QUANTUM COMPUTING**

6

Introduction to Quantum Computing – Moore's law and its limitations – Differences between Classical and Quantum computing  
– Concept of qubit and its properties – Representation of qubit by Bloch sphere – Single and Two qubits

**UNIT V: QUANTUM CIRCUITS**

6

Quantum devices – Qubit Gates, Single Qubit Gates: Quantum NOT Gate – Pauli – X, Y and Z Gates – Hadamard Gate –  
Phase Gate (or S Gate), T Gate – Multiple Qubit Gates (qualitative) – Quantum Chips

**CONTACT PERIODS:**

**Lecture:** 30 Periods      **Tutorial:** - Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 30 Periods

## SEMESTER I &amp; II

| U25RCY01 | Engineering Chemistry<br>(Common to AD, AM, BM, CB, CE, CH, CS, EC, EE, EV, IT, ME, MI, SC) | Category: BSC |   |   |   |   |
|----------|---------------------------------------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                                                             | L             | T | P | J | C |
|          |                                                                                             | 2             | 0 | 2 | 0 | 3 |

## COURSE OBJECTIVES:

- To introduce the fundamentals, properties, industrial applications of polymeric materials and advanced energy storage devices
- To impart knowledge about corrosion prevention, surface treatment methods and nanomaterials
- To provide a basic understanding of semiconductor materials, microelectronics, quantum, computational chemistry and their applications

## COURSE OUTCOMES:

|       |                                                                                                                           |       |
|-------|---------------------------------------------------------------------------------------------------------------------------|-------|
| CO 1: | Apply the concepts of polymer materials and their properties in solving industrial and technological challenges           | Apply |
| CO 2: | Interpret the performance of batteries, solar cells, and supercapacitors for their effective energy storage applications  | Apply |
| CO 3: | Utilize suitable corrosion prevention methods, surface treatment techniques and nanomaterials for industrial requirements | Apply |
| CO 4: | Apply suitable semiconductor materials, microfabrication processes and display technologies for specific applications     | Apply |
| CO 5: | Utilize quantum chemistry principles and AI-assisted techniques to model, visualize, and predict material properties      | Apply |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |

## SYLLABUS:

## UNIT I: POLYMERIC MATERIALS

6 + 6

Polymers – Introduction – Compounding – Compression, Injection – Smart Polymers – Temperature responsive (PNIPAM), pH responsive (PAA), Light responsive (Azobenzene), 3D Printable (PLA), flexible and wearable polymers (PDMS – E-skin, RFID) – Conductive Polymers (PEDOT) – Synthesis, working and applications – Biopolymers – Classification, PEG, Alginate Hydrogel – Synthesis and applications

**HEAD OF THE DEPARTMENT**  
Department of Information Technology  
KPR Institute of Engineering and Technology  
Arasur, Coimbatore – 641 407.

**UNIT II: ENERGY CONVERSION AND STORAGE****6 + 6**

Batteries – Classification,  $\text{LiFePO}_4$  – Construction, working and applications – Fuel Cells – Proton Exchange Membrane( PEM), Solid Oxide Fuel Cells (SOFC) – Green Hydrogen – Classification, production method, electrolysis – Organic photovoltaics – P3HT and PCBM – Working and applications – Solar Cells – Dye-Sensitized Solar Cells (DSSC), Supercapacitors – Electrostatic Double Layer– Working and application

**UNIT III: CORROSION AND NANO SCIENCE****6 + 6**

Types of corrosion – Factors influencing corrosion – Cathodic protection, Coatings – Galvanization, Epoxy, Polyurethane, Enamel, Superhydrophobic coatings – Process and applications, Surface treatments – Carburizing, Nitriding, Cyaniding – Process and applications, Nanomaterials – Introduction, 0D (Quantum dots), 1D (nanowire, nanorods and carbon nanotubes) 2D nanomaterials ( $\text{MoS}_2$ ), Size effects and quantum confinement, Synthesis – Laser ablation and Chemical Vapour Deposition (CVD), Various applications of nanomaterials

**UNIT IV: SEMICONDUCTOR AND DISPLAY TECHNOLOGY****6 + 6**

Semiconductors – Perfluoropentacene, GaN – Characteristics and applications, Neuromorphic Materials – Phase-Change Memory and Memristors – Working and applications – Liquid Crystal Displays, OLED, QLED – Working and applications – Wafer Manufacturing – Purification – Czochralski and Float Zone methods – Photolithography and microfabrication

**UNIT V: QUANTUM AND COMPUTATIONAL CHEMISTRY****6 + 6**

Quantum Chemistry – Basics, quantum numbers, shapes of atomic orbitals, Molecular Orbital Theory – ( $\text{H}_2$ ,  $\text{O}_2$ ,  $\text{N}_2$ ), Schrödinger equation (Derivation) – Qubits and Quantum Memory, Computational Chemistry – Molecular modeling – Basic Computational Methods – Software tools – iGemdock, Chem draw, Molview, Jmol – Introduction to AI and its role in the field of Chemistry

**LIST OF EXPERIMENTS**

1. Estimate the viscosity of a given polymer solution using an Ostwald viscometer and determine molecular weight of the given polymer
2. Synthesis of a polymer (Bakelite / polyaniline (PANI) and assess the physical properties of the polymer
3. Potentiometric determination and comparative study of EMF in different solutions
4. Determine maximum wavelength of absorption of a given solution to verify Beer's Law and to find unknown concentration of the given sample by Spectrophotometry / Colorimetry
5. Determination of corrosion rate of Iron and its prevention by electroplating / electroless plating
6. Synthesis of  $\text{ZnO}$  /  $\text{TiO}_2$  / Ag nanoparticles and study of their photocatalytic degradation of Methylene Blue dye
7. Recovery of Copper from waste Printed Circuit Boards (PCBs) and quantitative determination of copper content
8. Measurement of electrical conductivity of solutions using a conductometric Sensor
9. Perform molecular docking using freely available online software to investigate the binding affinity a ligand with the protein
10. Construct the 2D structure of a given compound and generate its 3D molecular model using computational tools for visualization and structural analysis

**CONTACT PERIODS:**

Lecture: 30 Periods      Tutorial: - Periods      Practical: 30 Periods      Project: - Periods      Total: 60 Periods

## SEMESTER I

| U25RCSG01 | C Programming<br>(Common to all programmes) | Category: ESC |   |   |   |   |
|-----------|---------------------------------------------|---------------|---|---|---|---|
|           |                                             | L             | T | P | J | C |
|           |                                             | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- To enable students to understand the fundamentals of problem-solving and C programming, including algorithms, flowcharts, pseudocode, and the structure of a C program
- To develop programming skills using input/output operations, control structures, arrays, strings, functions, pointers, and dynamic memory allocation
- To introduce user-defined data types such as structures and unions for handling complex data effectively
- To familiarize students with file handling concepts and develop C-based solutions for real-world applications

## COURSE OUTCOMES:

- CO 1:** Explain fundamental programming concepts, problem-solving techniques, and the basic structure of C Understand programs
- CO 2:** Develop C programs using input/output functions, operators, decision-making, and iterative control structures Apply
- CO 3:** Implement arrays and string handling concepts to solve data processing and real-world applications Apply
- CO 4:** Develop modular and efficient programs using functions, recursion, pointers, and dynamic memory allocation techniques Apply
- CO 5:** Apply user-defined data types and file handling operations to manage and process data effectively Apply

## SYLLABUS:

## UNIT I: PROBLEM SOLVING APPROACHES AND C PROGRAMMING BASICS

10

Problem Solving Techniques: Problem Statement and Analysis – Problem Modelling – Identifying Input and Output Requirements – Algorithms – Flowcharts – Pseudocode for Solving Basic Scientific and Business Problems. Introduction to C: Characteristics of C – Structure of a C Program – Compiling and Executing C Program – Pre-processor Directives – Tokens – Character Set – Keywords – Identifiers – Constants – Variables – Operators – Data Types – Typecasting – Input/Output Statements in C

**UNIT II: DECISION CONTROL AND LOOPING STATEMENTS**

8

Conditional Statements: if Statement – if-else Statement – Nested if Statements – else-if Ladder – switch Statement. Looping Statements: while Loop – do-while Loop – for Loop – Nested Loops. Jump Statements: break Statement – continue Statement – goto Statement

**UNIT III: ARRAYS AND STRINGS**

9

Arrays: Declaration and Initialization – Accessing and Manipulating Array Elements – One-Dimensional Arrays – Two-Dimensional Arrays – Applications of Arrays. Strings: Declaration and Initialization of Strings – String Handling Functions – String Arrays

**UNIT IV: FUNCTIONS AND POINTERS**

9

Functions: Definition – Function Call – Function Prototype – Return Statement – Types of Functions – Recursive Functions – Command Line Arguments. Pointers: Declaration and Initialization – Pointer Arithmetic – Passing Arguments by Value and by Reference – Pointer to Pointer – Pointers and Arrays. Dynamic Memory Allocation: malloc(), calloc(), realloc(), free()

**UNIT V: USER-DEFINED DATA TYPES AND FILE MANAGEMENT**

9

Structures: Declaration and Initialization – Accessing Structure Members – Arrays of Structures – Nested Structures – Pointer to Structures. Unions – Storage Classes. Files: File Access Methods – File Modes – File Operations – File Pointers – Binary File Operations

**CONTACT PERIODS:**

## SEMESTER I

| U25RCSG02 | Essentials of Computing<br>(Common to AD, AM, CB, CS, IT, SC) | Category: PCC |   |   |   |   |
|-----------|---------------------------------------------------------------|---------------|---|---|---|---|
|           |                                                               | L             | T | P | J | C |
|           |                                                               | 2             | 0 | 0 | 0 | 2 |

## COURSE OBJECTIVES:

- To introduce the fundamentals of computing systems, computer organization, digital information representation, and operating systems
- To develop computational thinking and problem-solving skills using decomposition, abstraction, algorithms, flowcharts, and pseudocode
- To familiarize students with programming fundamentals, software development processes, programming environments, and language translation tools
- To provide an understanding of emerging computing technologies and their applications in solving real-world problems

## COURSE OUTCOMES:

- CO 1:** Describe the fundamentals of computing systems, computer organization, memory, processors, operating systems, and emerging computing technologies **Understand**
- CO 2:** Apply computational thinking and problem-solving techniques using decomposition, abstraction, algorithms, flowcharts, pseudocode, variables, and operators **Apply**
- CO 3:** Explain programming environments, software development processes, language translation tools, and visual programming concepts **Understand**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 1    | 3    |
| CO 2       | 2   | 3   | 1   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |

## SYLLABUS:

## UNIT I: COMPUTING FUNDAMENTALS

10

Introduction to Computing: Characteristics and Applications of Computers – Classification of Computers – Evolution of Computers – Basic Organization of a Computer – CPU, Memory and Storage Devices – Input and Output Devices – Operating Systems and their Functions. Computer Architecture and Emerging Technologies: Computer Memory and Processors – Basic Processor Architecture – Pipelining and Parallel Processing – Types of Processors – Emerging Trends in Computing: Artificial Intelligence, Quantum Computing and Quantum Communication

## UNIT II: COMPUTATIONAL THINKING AND DIGITAL REPRESENTATION

10

Computational Thinking: Decomposition – Pattern Recognition – Abstraction – Algorithmic Thinking – Real-World Applications of Computational Thinking. Digital Representation of Information: Data Representation in Computers – ASCII and Unicode – Number Systems: Binary, Decimal and Hexadecimal – Binary Arithmetic Basics – Sequential and Parallel Processing Concepts – Computational Thinking Case Studies

**UNIT III: PROGRAMMING ENVIRONMENTS AND SOFTWARE DEVELOPMENT**

10

Programming Languages and Software: Generations of Programming Languages – Classification of Programming Languages – Computer Software: System Software and Application Software – Open-Source and Proprietary Software. Language Translators and Development Tools: Compiler – Interpreter – Assembler – Linker – Loader – Overview of Software Development Process, Tools and Techniques. Visual Programming: Introduction to Visual Programming using Scratch/Turtle Environment – Developing Simple Programs using Blocks and Graphics

**CONTACT PERIODS:**

## SEMESTER I

| U25RCSG03 | C Programming Laboratory<br>(Common to all programmes) | Category: ESC |   |   |   |   |
|-----------|--------------------------------------------------------|---------------|---|---|---|---|
|           |                                                        | L             | T | P | J | C |
|           |                                                        | 0             | 0 | 2 | 0 | 1 |

## COURSE OBJECTIVES:

- To provide hands-on experience in problem solving and structured programming using the C programming language
- To develop programming skills using control structures, arrays, strings, functions, pointers, and dynamic memory management techniques
- To enable students to design and implement applications using user-defined data types and file handling concepts for real-world problems

## COURSE OUTCOMES:

- CO 1:** Demonstrate problem-solving techniques, algorithms, flowcharts, and basic C programming constructs in program development **Apply**
- CO 2:** Develop C programs using input/output operations, decision-making statements, and iterative constructs **Apply**
- CO 3:** Demonstrate the use of arrays and strings for data processing and manipulation **Apply**
- CO 4:** Develop modular applications using functions, recursion, pointers, and dynamic memory management techniques **Apply**
- CO 5:** Develop applications using structures, unions, storage classes, and file handling operations for data management **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 2       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 3       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 4       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 3    | 3    |
| CO 5       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 3    | 3    |

## LIST OF EXPERIMENTS

1. Design and implementation of algorithms, flowcharts, and pseudo code for basic problem-solving applications
2. Development of C programs demonstrating data types, operators, and formatted input/output operations
3. Implementation of decision-making applications using conditional statements and switch-case constructs
4. Development of iterative applications using looping and loop control statements
5. Design and implementation of console-based applications for real-world mathematical and logical problem solving
6. Implementation of one-dimensional array operations for searching, sorting, and statistical analysis
7. Development of matrix manipulation applications using two-dimensional arrays
8. Design and implementation of string processing applications using standard string handling functions
9. Development of modular applications using user-defined functions and recursive techniques
10. Implementation of applications demonstrating parameter passing mechanisms using call by value and call by reference
11. Development of applications using pointers, pointer arithmetic, and array-pointer relationships

10. Implementation of applications demonstrating parameter passing mechanisms using call by value and call by reference
11. Development of applications using pointers, pointer arithmetic, and array-pointer relationships
12. Implementation of dynamic memory management applications using malloc(), calloc(), realloc(), and free()
13. Design and implementation of applications using structures, nested structures, unions, and storage classes
14. Development of file processing applications using text and binary file operations in C
15. Implementation of command-line and console-based applications integrating functions, pointers, structures, and file management concepts for real-world use cases

## GUIDELINES:

Students come with diverse thoughts, backgrounds and preparations. It is important to assist them adjust in the new environment and inculcate in them the ethos of the institution with a sense of larger purpose. Keeping the above thought in mind AICTE proposes a 3-week induction program for the UG students entering the institution before the commencement of normal classes which will start only after the induction program is over. Its purpose is to make the students feel comfortable in their new environment, set a healthy daily routine, create bonding in the batch as well as between faculty, develop awareness, sensitivity and understanding of the self, society at large, and nature. The following are the activities under the induction program in which the student should be fully and actively engaged throughout the entire duration of the program.

**Physical Activity:** To inculcate team spirit, competitiveness, group cohesion and bonding as well as physical & mental health, physical activities like team sports, yoga, physical exercises should be conducted daily during early morning & evening. Activities like gardening may also be encouraged.

**Creative Arts:** Every student should choose one skill related to arts /visual arts/ performing arts like painting, sculpture, pottery, music, dance etc. to develop a sense of aesthetics and also to enhance creativity. The student should pursue it daily for the duration of the program.

**Universal Human Values:** Universal Human Values module will help the student to explore oneself and experience the joy of learning, stand up to peer pressure, take decisions with courage, create awareness about the relationship with colleagues and supporting staff in the hostel and department, etc.

**Literary:** Literary activity would encompass reading, writing and possibly, debating, enacting a play etc.

**Proficiency Modules:** To establish the command over skills like English, a computer familiarity etc. these modules can be taught earlier so that when normal classes start, the students are well-prepared.

## SEMESTER I

| U25RMCC01 | Universal Human Values<br>(Common to AD, AM, BM, CB, CE, CH, CS, EC, EE, EV, IT, ME, MI, SC) | Category: MCC |   |   |   |   |
|-----------|----------------------------------------------------------------------------------------------|---------------|---|---|---|---|
|           |                                                                                              | L             | T | P | J | C |
|           |                                                                                              | 3             | 0 | 0 | 0 | 3 |

QP PATTERN: A

## COURSE OBJECTIVES:

- To understand the significance of universal human values and their role in complementing technical, intellectual, and professional skills for holistic development.
- To apply a holistic perspective in addressing personal, societal, professional, and environmental challenges through ethical and value-based approaches.
- To demonstrate responsible citizenship, professional ethics, mutual respect, and sustainable practices that contribute positively to society, industry, and the environment.

## COURSE OUTCOMES:

- CO 1:** Explain the significance of Universal Human Values and self-exploration in developing a holistic perspective, enabling students to harmonize technical competence with ethical responsibility and value-based living. **Understand**
- CO 2:** Differentiate the needs of the Self and the Body, and apply self-exploration to develop healthy habits, value-based decision-making, and holistic well-being. **Understand**
- CO 3:** Explain the concepts of natural acceptance, competence, and respect, and apply them to foster harmonious relationships, resolve social conflicts, promote value education for children, and develop holistic perspectives for societal development. **Understand**
- CO 4:** Demonstrate an understanding of the interconnectedness of existence and integrate holistic perspectives into academic, professional, and societal contexts. **Apply**
- CO 5:** Apply human values and professional knowledge to promote sustainable development, family harmony, societal well-being, and responsible participation in nature. **Apply**

## SYLLABUS:

**UNIT I: INTRODUCTION TO VALUE EDUCATION**

9

Right Understanding, Relationship and Physical Facility (Holistic Development and the Role of Education) – Understanding Value Education – Self-exploration as the Process for Value Education – Continuous Happiness and Prosperity – the Basic Human Aspirations – Happiness and Prosperity: Current Scenario – Method to Fulfil the Basic Human Aspirations. Self-Exploration Activity Topics: Sharing about Oneself – Exploring Human Consciousness

**UNIT II: HARMONY IN THE HUMAN BEING**

9

Understanding Human being as the Co-existence of the Self and the Body – Distinguishing between the Needs of the Self and the Body – The Body as an Instrument of the Self – Understanding Harmony in the Self – Harmony of the Self with the Body – Programme to ensure self-regulation and Health. Self-Exploration Activity Topics: Exploring the difference of Needs of Self and Body – Exploring Sources of Imagination in the Self – Exploring Harmony of Self with the Body

**UNIT III: HARMONY IN THE FAMILY AND SOCIETY**

9

Harmony in the Family – the Basic Unit of Human Interaction – 'Trust': the Foundational Value in Relationship – 'Respect': as the Right Evaluation – Other Feelings, Justice in Human-to-Human Relationship – Understanding Harmony in the Society – Vision for the Universal Human Order. Self-Exploration Activity Topics: Exploring the Feeling of Trust – Exploring the Feeling of Respect – Exploring Systems to fulfil Human Goal

**UNIT IV: HARMONY IN THE NATURE/EXISTENCE**

9

Understanding Harmony in the Nature – Interconnectedness, self-regulation and Mutual Fulfilment among the Four Orders – Realizing Existence as Co-existence at All Levels – The Holistic Perception of Harmony in Existence. Self-Exploration Activity Topics: Exploring the Four Orders of Nature – Exploring Co-existence in Existence

**UNIT V: HARMONY ON PROFESSIONAL ETHICS : HOLISTIC UNDERSTANDING**

9

Natural Acceptance of Human Values – Definitiveness of (Ethical) Human Conduct – A Basis for Humanistic Education, Humanistic Constitution and Universal Human Order – Competence in Professional Ethics – Holistic Technologies, Production Systems and Management Models: Typical Case Studies – Strategies for Transition towards Value-based Life and Profession. Self-Exploration Activity Topics: Exploring Natural Acceptance – Exploring Ethical Human Conduct – Exploring Humanistic Models in Education – Exploring Steps of Transition towards Universal Human Order

**CONTACT PERIODS:**

## SYLLABUS:

## UNIT I: LANGUAGE AND LITERATURE

3

Language Families in India - Dravidian Languages – Tamil as a Classical Language – Classical Literature in Tamil – Secular Nature of Sangam Literature – Distributive Justice in Sangam Literature – Management Principles in Thirukural – Tamil Epics and Impact of Buddhism & Jainism in Tamil Land – Bakthi Literature Azhwars and Nayanmars – Forms of minor Poetry – Development of Modern literature in Tamil – Contribution of Bharathiyar and Bharathidhasan

## UNIT II: HERITAGE - ROCK ART PAINTINGS TO MODERN ART – SCULPTURE

3

Hero stone to modern sculpture – Bronze icons – Tribes and their handicrafts – Art of temple car making – Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments – Mridhangam, Parai, Veenai, Yash and Nadhaswaram – Role of Temples in Social and Economic Life of Tamils

## UNIT III: FOLK AND MARTIAL ARTS

3

Tattooing, basket weaving, Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leatherpuppetry, Silambattam, Valari, Tiger dance – Sports and Games of Tamils

**UNIT IV: THINAI CONCEPT OF TAMILS****3**

Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature – Aram Concept of Tamils – Education and Literacy during Sangam Age – Ancient Cities and Ports of Sangam Age – Export and Import during Sangam Age – Overseas Conquest of Cholas

**UNIT V: CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN CULTURE****3**

Contribution of Tamils to Indian Freedom Struggle – The Cultural Influence of Tamils over the other parts of India – Self-Respect Movement – Role of Siddha Medicine in Indigenous Systems of Medicine – Inscriptions & Manuscripts – Print History of Tamil Books

**CONTACT PERIODS:**

|           |                                                                  | L             | T | P | J | C |
|           |                                                                  | 15 Hours      |   |   |   | 1 |

## COURSE OUTCOMES:

- CO 1:** Demonstrate technical skill competency through attainment of industry-relevant certifications, participation in competitions, internships, and project-based learning activities **Apply**
- CO 2:** Apply research, innovation, and problem-solving skills to develop impactful solutions through projects, publications, patents, and higher education preparation **Apply**
- CO 3:** Exhibit leadership, ethical responsibility, community engagement, and professional digital presence to enhance career readiness and lifelong learning **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |

## SEMESTER II

| U25REN201 | Professional Communication - II<br>(Common to AD, AM, BM, CB, CE, CH, CS, EC, EE, EV, IT, ME, MI, SC) | Category: HSMC |   |   |   |   |
|-----------|-------------------------------------------------------------------------------------------------------|----------------|---|---|---|---|
|           |                                                                                                       | L              | T | P | J | C |
|           |                                                                                                       | 2              | 0 | 2 | 0 | 3 |

## COURSE OBJECTIVES:

- To strengthen advanced communication and interpersonal skills required for academic and professional success
- To integrate AI-enabled communication tools for content creation, presentations and professional documentation
- To prepare students for modern workplace communication in global and digital environments

## COURSE OUTCOMES:

|                                                                                                            |            |
|------------------------------------------------------------------------------------------------------------|------------|
| CO 1: Apply advanced verbal, written and digital communication strategies in professional contexts         | Apply      |
| CO 2: Analyze technical information and produce effective workplace documents                              | Analyze    |
| CO 3: Demonstrate negotiation, leadership and collaborative communication skills                           | Understand |
| CO 4: Deliver impactful technical presentations and communicate innovative ideas effectively               | Apply      |
| CO 5: Utilize AI-assisted communication tools ethically for professional growth and workplace productivity | Apply      |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | -   | -   | -   | -   | -   | -   | -   | 2   | 3   | -    | 1    | -    | -    |

| CO 4       | -   | -   | -   | -   | -   | -   | -   | 2   | 3   | -    | 1    | 1    | 1    |
| CO 5       | -   | -   | -   | -   | -   | -   | -   | 2   | 3   | -    | 1    | 1    | 1    |

## SYLLABUS:

## UNIT I: TECHNICAL WRITING AND DOCUMENTATION

6 + 6

Technical Reports - Proposal Writing - Meeting Agenda and Minutes - Technical Instructions and Process Description - AI-assisted Technical Documentation - Technical Vocabulary

## UNIT II: COGNITIVE PROFESSIONALISM

6 + 6

Critical Thinking Strategies - Problem-solving Communication - Case Study - Brainstorming Techniques - Collaborative Decision Making - One-word Substitutions

## UNIT III: CAREER PLANNING

6 + 6

Self-Assessment Techniques - SWOT Analysis - Goal Setting - AI-assisted Documentation - Digital Content Writing - Collocations

**UNIT IV: CORPORATE COMMUNICATION AND NETWORKING**

**6 + 6**

Public Speaking - Welcome Address - Vote of Thanks - Anchoring and Event Hosting - Audience Engagement - Cloze tests - Discourse markers - linkers and cohesive devices

**UNIT V: CRITICAL THINKING AND COLLABORATIVE PROBLEM SOLVING**

**6 + 6**

Problem-solving Techniques - Mind Mapping - Negotiation Skills - Book Review / Film Review - Podcast and Media Analysis - Critical Reading - Group Discussion

**LIST OF EXPERIMENTS**

1. Public Speaking
2. Group Discussion
3. Case Study
4. Blog Writing
5. Mind Mapping

**CONTACT PERIODS:**

**Lecture:** 30 Periods      **Tutorial:** - Periods      **Practical:** 30 Periods      **Project:** - Periods      **Total:** 60 Periods

**TEXTBOOKS:**

1. Ashraf Rizvi, Effective Technical Communication, 3rd Edition, McGraw Hill Education, 2023
2. Meenakshi Raman & Sangeeta Sharma, Technical Communication: Principles and Practice, 4th Edition, Oxford University Press, 2023
3. Sanjay Kumar & Pushp Lata, Communication Skills, 3rd Edition, Oxford University Press, New Delhi, 2018

3. Matt Abrahams, Think Faster, Talk Smarter: How to Speak Successfully When You're Put on the Spot, Simon & Schuster, New York, 2024

## SEMESTER II

| U25RMA201 | Linear Algebra and Number Theory<br>(Common to AD, AM, CB, CS, IT, SC) | Category: BSC |   |   |   |   |
|-----------|------------------------------------------------------------------------|---------------|---|---|---|---|
|           |                                                                        | L             | T | P | J | C |
|           |                                                                        | 3             | 0 | 2 | 0 | 4 |

## COURSE OBJECTIVES:

- To introduce the foundational concepts of linear algebra and number theory pertinent to algorithmic applications
- To develop the ability to model and solve computational problems using mathematical structures
- To impart in-depth theoretical concepts in practical scenarios through computational tools

## COURSE OUTCOMES:

|                                                                                                                                   |       |
|-----------------------------------------------------------------------------------------------------------------------------------|-------|
| CO 1: Apply Gaussian elimination, Gauss–Jordan elimination, and LU decomposition methods to solve the systems of linear equations | Apply |
| CO 2: Apply the concepts of vector spaces, subspaces, basis, and dimension in computational contexts                              | Apply |
| CO 3: Determine eigenvalues, eigenvectors, and diagonalization of matrices for engineering applications                           | Apply |
| CO 4: Apply number theoretic concepts such as divisibility, congruence, and modular arithmetic in computational problems          | Apply |
| CO 5: Implement cryptographic algorithms using modular arithmetic and RSA principles                                              | Apply |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | -   | -   | 2   | -   | -   | -   | 1   | -    | 1    | 2    | 2    |
| CO 2       | 3   | 2   | -   | -   | 2   | -   | -   | -   | 1   | -    | 1    | 2    | 2    |
| CO 3       | 3   | 2   | -   | -   | 2   | -   | -   | -   | 1   | -    | 1    | 2    | 3    |
| CO 4       | 3   | 2   | -   | -   | 2   | -   | -   | -   | 1   | -    | 1    | 3    | 3    |
| CO 5       | 3   | 2   | -   | -   | 2   | -   | -   | -   | 1   | -    | 1    | -    | 3    |

## SYLLABUS:

## UNIT I: SYSTEMS OF LINEAR EQUATIONS

9 + 6

Systems of linear equations – Gaussian elimination – Gauss – Jordan elimination method – LU decomposition method – Consistency of linear systems and rank of a matrix

## UNIT II: VECTOR SPACES

9 + 6

Definition and examples of vector spaces – subspaces – Linear independence – Basis and dimension of vector spaces – Linear transformations and matrix representation

## UNIT III: EIGENVALUES AND EIGENVECTORS

9 + 6

Eigenvalues and eigenvectors – Characteristic equation– Diagonalization of matrices – Cayley–Hamilton theorem – Applications of eigenvalues and eigenvectors

## UNIT IV: ELEMENTARY NUMBER THEORY

9 + 6

Divisibility and prime numbers – Greatest common divisors – Euclidean algorithm and its applications – Congruence and modular arithmetic – Euler's Totient Function – Chinese Remainder theorem – Fermat's Little theorem

**UNIT V: NUMBER THEORY IN CRYPTOGRAPHY**

9 + 6

Modular exponentiation – Modular inverse computations – Introduction to cryptography – RSA algorithm basics – Diffie–Hellman Key Exchange and Digital Signatures – Applications in secure communication

**LIST OF EXPERIMENTS**

1. Systems of Linear Equations – Solve systems of linear equations using Gauss–Jordan method – Implement LU decomposition method
2. Vector Space Computations – Determine linear independence and basis of vectors – Compute dimension and rank of matrices
3. Eigenvalues and Diagonalization (6) – Compute eigenvalues and eigenvectors of matrices – Perform matrix diagonalization
4. Number Theory Computations – Implement Euclidean algorithm for finding GCD – Solve congruence problems using the Chinese Remainder theorem
5. Cryptographic Applications – Implement modular exponentiation and modular inverse computations – Simulate RSA encryption and decryption

**CONTACT PERIODS:**

Lecture: 45 Periods      Tutorial: - Periods      Practical: 30 Periods      Project: - Periods      Total: 75 Periods

**TEXTBOOKS:**

## SEMESTER I &amp; II

| U25RPH01 | Engineering Physics<br>(Common to all programmes) | Category: BSC |   |   |   |   |
|----------|---------------------------------------------------|---------------|---|---|---|---|
|          |                                                   | L             | T | P | J | C |
|          |                                                   | 2             | 0 | 2 | 0 | 3 |

## COURSE OBJECTIVES:

- To understand the fundamental mechanical and thermal properties of solids and fluids for real-world engineering applications
- To explore advanced concepts in ultrasonic waves and their applications in imaging, testing, and sensing technologies
- To gain insights into semiconductor physics and photonics for their role in modern electronic and optical systems

## COURSE OUTCOMES:

|       |                                                                                                                             |       |
|-------|-----------------------------------------------------------------------------------------------------------------------------|-------|
| CO 1: | Apply the stress-strain behavior concepts in engineering materials and structures                                           | Apply |
| CO 2: | Apply principles of heat transfer and fluid mechanics to evaluate thermal systems and engineering applications              | Apply |
| CO 3: | Demonstrate the operation of ultrasonic wave generation and detection techniques for industrial and biomedical applications | Apply |
| CO 4: | Analyze the electrical properties and carrier transport mechanisms in semiconductors and semiconductor devices              | Apply |
| CO 5: | Demonstrate the principles of lasers and optical fibers in communication, sensing, and biomedical applications              | Apply |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 1   | -   | 1   | -   | -   | 1   | 1   | -    | -    | 1    | 1    |
| CO 2       | 3   | 2   | 1   | -   | 1   | -   | -   | 1   | 1   | -    | -    | 1    | 1    |
| CO 3       | 3   | 2   | 1   | -   | 1   | -   | -   | 1   | 1   | -    | -    | 1    | 1    |
| CO 4       | 3   | 2   | 1   | -   | 1   | -   | -   | 1   | 1   | -    | -    | 2    | 1    |
| CO 5       | 3   | 2   | 1   | -   | 1   | -   | -   | 1   | 1   | -    | -    | -    | 1    |

## SYLLABUS:

## UNIT I: MECHANICAL PROPERTIES OF SOLIDS

6 + 6

Modulus of Elasticity – Stress-strain diagram – Poisson's ratio – Elastic and plastic deformation – Stress-strain behaviour in metals, polymers and ceramics – Bending Moment – Cantilever – Applications (GIRDERS, MEMS)

## UNIT II: FUNDAMENTALS OF HEAT TRANSFER AND FLUIDS

6 + 6

Heat transfer – Thermal expansion – Heat conductivity – Lee's Disc method – Surface tension – Viscosity – Coefficient of viscosity using Poiseuille's flow experiment – Solar water heater – Microwave oven – Heat exchangers – Radiators – Cooling towers

**UNIT III: ULTRASONICS AND ITS APPLICATIONS****6 + 6**

Properties of Ultrasonic waves – Production of ultrasonic waves – Piezoelectric Oscillator – Magnetostriction Oscillator – Velocity measurement of Ultrasonic waves – SONAR – Non-Destructive Testing – Ultrasound imaging – Ultrasonic scanning methods

**UNIT IV: SEMICONDUCTOR PHYSICS****6 + 6**

Properties – Direct and Indirect bandgap-semiconductor – Intrinsic and extrinsic Semiconductors – Carrier concentration in n-type semiconductor – P-type semiconductor – Carrier Transport in Semiconductor – Hall effect – Ohmic contacts – Schottky diode

**UNIT V: PHOTONICS****6 + 6**

Interaction of Radiation with Matter – Laser Characteristics – Population Inversion – CO<sub>2</sub> laser – Semiconductor Diode Laser – Laser applications – Total Internal Reflection – Structure and working principle of Optical fibre – Fiber optic Endoscopy – Fiber optic sensors

**LIST OF EXPERIMENTS**

1. Determine the moduli of elasticity of the given beams and evaluate them for different structural applications. (High/Medium/Low modulus)
2. Evaluate the shear moduli of the different materials and rank them for suitable applications with reference to their strength
3. Select the most effective thermal insulation material from mica, cardboard, and glass for optimal heat protection
4. Determine the Viscosity of Liquids Using Poiseuille's Method and Identify the Fastest-Flowing Liquid
5. Measure the speed of ultrasound in liquids and calculate their compressibility for different hydraulic purposes
6. Categorize the specified semiconducting materials according to their energy bandgap values
7. Determine a semiconducting material's Hall coefficient and identify its type
8. Determination of wavelength of given laser and the particle size of the given samples using diffraction method
9. Use an optical fiber to measure its light-gathering capacity and calculate the propagation angle
10. Calculate the surface tension of different liquids and examine how surfactants affect it
11. Determination of wavelength of various spectral lines by using spectrometer and grating
12. Determination of velocity of light passing through glass medium using spectrometer

**CONTACT PERIODS:**

**Lecture:** 30 Periods      **Tutorial:** - Periods      **Practical:** 30 Periods      **Project:** - Periods      **Total:** 60 Periods

**TEXTBOOKS:**

## SEMESTER II

| U25RCSG04 | Python Programming<br>(Common to all programmes) | Category: ESC |   |   |   |   |
|-----------|--------------------------------------------------|---------------|---|---|---|---|
|           |                                                  | L             | T | P | J | C |
|           |                                                  | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- To introduce the fundamental concepts of Python programming, including syntax, data types, operators, and input/output operations
- To develop problem-solving skills through the use of control structures, functions, recursion, and modular programming techniques
- To provide proficiency in Python collections, file handling, exception handling, and program organization using modules and packages
- To familiarize students with basic object-oriented programming concepts and the use of Python libraries for data analysis applications

## COURSE OUTCOMES:

- CO 1:** Explain Python programming fundamentals, including data types, operators, input/output operations, and **Understand** debugging techniques
- CO 2:** Develop Python programs using decision-making statements, iterative constructs, functions, recursion, and variable scope concepts **Apply**
- CO 3:** Implement string processing and Python collections such as lists, tuples, sets, and dictionaries to solve computational problems **Apply**
- CO 4:** Develop modular Python programs using file handling, exception handling, modules, and packages **Apply**
- CO 5:** Develop simple object-oriented programs and apply NumPy and Pandas libraries for basic data analysis applications **Apply**

## CO - PO MAPPING:

## SYLLABUS:

## UNIT I: PYTHON FUNDAMENTALS

9

Introduction to Python – Features and Applications of Python – Installing Python – Python Interpreter – Script and Interactive Modes – Identifiers and Keywords – Variables – Data Types – Type Conversion – Operators and Expressions – Input and Output Operations – Comments and Documentation – Error Types – Testing and Debugging Basics

**UNIT II: CONTROL STRUCTURES AND FUNCTIONS**

9

Conditional Statements – Nested Conditional Statements – Iterative Statements: while Loop and for Loop – Loop Control Statements – Functions – Function Definition and Invocation – Function Arguments and Return Values – Scope of Variables – Recursive Functions – Applications of Functions in Problem Solving

**UNIT III: STRINGS AND PYTHON COLLECTIONS**

9

Strings and String Operations – Lists and List Operations – List Comprehensions – Tuples and Tuple Operations – Sets and Set Operations – Dictionaries and Dictionary Operations – Packing and Unpacking

**UNIT IV: FILE HANDLING, MODULES AND EXCEPTION HANDLING**

9

Modules and Packages – Importing Modules – Built-in Functions – File Handling – Opening and Closing Files – Reading and Writing Files – File Methods – Exception Handling – try, except, else and finally Blocks – User Defined Exceptions

**UNIT V: OBJECT-ORIENTED PROGRAMMING AND DATA ANALYSIS**

9

Classes and Objects – Creating Classes and Objects – Constructors – Instance Variables and Methods – Introduction to NumPy – Creating Arrays – Array Operations – Indexing and Slicing – Introduction to Pandas – Series and DataFrames – Reading and Displaying Data – Simple Data Analysis Applications.

**CONTACT PERIODS:**

## SEMESTER II

| U25RECG03 | Digital Electronics<br>(Common to CB, CS, IT, SC) | Category: ESC |   |   |   |   |
|-----------|---------------------------------------------------|---------------|---|---|---|---|
|           |                                                   | L             | T | P | J | C |
|           |                                                   | 3             | 0 | 2 | 0 | 4 |

## COURSE OBJECTIVES:

- To understand the fundamentals of digital logic circuits
- To design the combinational logic circuits
- To design the synchronous and asynchronous sequential circuits

## COURSE OUTCOMES:

|                                                                                     |         |
|-------------------------------------------------------------------------------------|---------|
| CO 1: Apply various reduction methods to simplify logic expressions                 | Apply   |
| CO 2: Implement the combinational logic circuits using logic gates                  | Apply   |
| CO 3: Examine the performances of latches and flip-flops                            | Analyze |
| CO 4: Construct sequential logic circuits using flip-flops                          | Apply   |
| CO 5: Design a counters using shift register and realize hazard free logic circuits | Analyze |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | 2   | 2    | 1    | 3    | 1    |
| CO 2       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | 2   | 2    | 1    | 3    | 2    |
| CO 3       | 3   | 3   | 2   | 2   | -   | -   | -   | -   | 2   | 2    | 1    | 2    | 1    |
| CO 4       | 3   | 3   | 1   | 1   | -   | -   | -   | -   | 2   | 2    | 1    | 3    | 2    |
| CO 5       | 3   | 2   | 2   | 2   | -   | -   | -   | -   | 2   | 2    | 1    | 3    | 2    |

## SYLLABUS:

## UNIT I: BOOLEAN THEOREMS AND LOGIC REDUCTION

9 + 6

Number system – Complements – Boolean theorems – Codes – Logic gates – NAND and NOR gates – Representation of boolean expression – SOP, POS, canonical form – Simplification of logic functions using K-map, Quine McCluskey method

## UNIT II: COMBINATIONAL LOGIC DESIGN

9 + 6

Adder-1 Bit adder/subtractor, parallel adder, 2's complement adder/subtractor – Implementation of combinational circuits – Multiplexers, decoders, encoders, demultiplexers – Code converters – Error detection and correction codes – Parity generator and checker

## UNIT III: LATCHES AND FLIPFLOPS

9 + 6

Latches – NOR, NAND – Digital pulses – Clocked flip-flops – Master/Slave flip-flop – Asynchronous inputs – Flip-flop timing considerations – Conversion of flip-flop

## UNIT IV: SEQUENTIAL CIRCUITS

9 + 6

General model of sequential circuits – Mealy/Moore models, excitation table, state table, state diagram – Design of synchronous sequential circuits – Synchronous up/down counters, modulus counters – Asynchronous counter – Sequence detector

**UNIT V: REGISTERS AND HAZARDS**

9 + 6

Shift registers – Universal shift register, Ring counter, Johnson counter – Hazards and Essential Hazards in logic circuits – Design of Hazard free circuits

**LIST OF EXPERIMENTS**

1. Characteristics of digital IC's
2. Implementation of combinational logic design using MUX IC's
3. Design and implementation of various data path elements (Adder/Subtractor)
4. Characteristics of flip-flop
5. Design and implementation of synchronous sequential circuit (Counters/ Shift registers)
6. Design and implementation of asynchronous mod counters
7. Design of real time clock using BCD-to-7 segment decoder

**CONTACT PERIODS:**

**Lecture:** 45 Periods      **Tutorial:** - Periods      **Practical:** 30 Periods      **Project:** - Periods      **Total:** 75 Periods

**TEXTBOOKS:**

## SEMESTER II

| U25RCSG05 | Linux and Shell Scripting<br>(Common to AD, AM, CB, CS, IT, SC) | Category: PCC |   |   |   |   |
|-----------|-----------------------------------------------------------------|---------------|---|---|---|---|
|           |                                                                 | L             | T | P | J | C |
|           |                                                                 | 1             | 0 | 2 | 0 | 2 |

## COURSE OBJECTIVES:

- To introduce Linux operating system and command-line interface
- To familiarize students with basic file handling and shell commands
- To enable students to write and execute shell scripts for automation

## COURSE OUTCOMES:

CO 1: Understand and execute basic Linux commands

Understand

CO 2: Manage files, directories, and permissions in Linux

Apply

CO 3: Write and debug shell scripts to automate system tasks

Apply

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | -   | -   | 3   | -   | -   | -   | 1   | -    | -    | 2    | 1    |
| CO 2       | 3   | 3   | 2   | -   | 3   | -   | -   | -   | 2   | -    | -    | 2    | 1    |
| CO 3       | 3   | 3   | 2   | -   | 3   | -   | -   | -   | 2   | -    | -    | 2    | 1    |

## SYLLABUS:

## UNIT I: INTRODUCTION TO LINUX ENVIRONMENT AND FILE MANAGEMENT

5 + 10

Introduction to Linux environment – Linux login process, terminal usage, Linux file system structure – Basic Linux commands such as ls, pwd, cd, clear, whoami, date and cal – File and directory handling concepts including creation, deletion and management of files – Directories using commands like mkdir, rmdir, touch, cat, cp, mv, rm, head, tail, more and less – File permissions and ownership concepts including read, write and execute permissions, chmod, chown, umask commands, symbolic and numeric modes of permission management

## UNIT II: LINUX UTILITIES AND SYSTEM ADMINISTRATION COMMANDS

5 + 10

File searching – Filtering utilities in Linux including find, locate, grep, sort, uniq, cut, wc, diff and cmp commands – Process management and system monitoring concepts using ps, top, kill, nice, df, du, uptime, free, uname and who commands – Archiving and compression utilities including creation, extraction and management of archive files using tar, gzip, gunzip, zip, unzip and xz commands

## UNIT III: SHELL SCRIPTING AND AUTOMATION

5 + 10

Introduction to shell scripting, writing and executing simple shell scripts, use of comments, variables, read and echo commands, arithmetic operations using expr and let – Decision-making statements in shell scripting including if, if-else, if-elif-else, test conditions, integer, string and file comparisons – Looping constructs such as for, while and until loops with break and continue statements – Advanced shell scripting concepts including user-defined functions, function declaration, calling, passing arguments, scope of variables, command line arguments using \$1, \$2, \$@ and \$# and automation of tasks such as backup and log monitoring

## LIST OF EXPERIMENTS

1. Basic Linux Commands & File Management Introduction to Linux Environment - Login process, terminal, file system structure, basic commands: ls, pwd, cd, clear, whoami, date, cal
2. File and Directory Handling Commands: mkdir, rmdir, touch, cat, cp, mv, rm, head, tail, more, less
3. File Permissions and Ownership : Use of chmod, chown, umask, symbolic and numeric modes of permissions
4. Working with Linux Utilities File Searching and Filtering Use of find, locate, grep, sort, uniq, cut, wc, diff, cmp
5. Process Management and System Monitoring Commands: ps, top, kill, nice, df, du, uptime, free, uname, who
6. Archiving and Compression Utilities: Using tar, gzip, gunzip, zip, unzip, xz
7. Shell Scripting Basics Writing Simple Shell Scripts : Hello world, script execution, comments, variables, read, echo, expr, let
8. Conditional Statements in Shell Use of if, if-else, if-elif-else, test conditions, integer/string/file comparisons
9. Looping Constructs in Shell : for, while, until loops; loop control commands: break, continue
10. Advanced Shell Scripting: User-defined Functions in Shell Scripts: Declaring, calling functions, passing arguments, scope of variables
11. Command Line Arguments and Script Automation : Use of \$1, \$2, \$@, \$#, automating tasks like backup, log monitoring

**CONTACT PERIODS:**

## SEMESTER I &amp; II

| U25RGE01 | Makerspace<br>(Common to all programmes) | Category: ESC |   |   |   |   |
|----------|------------------------------------------|---------------|---|---|---|---|
|          |                                          | L             | T | P | J | C |
|          |                                          | 0             | 0 | 4 | 0 | 2 |

## COURSE OBJECTIVES:

- Apply fundamental fabrication, electrical, electronics, programming, and digital manufacturing techniques for engineering applications
- Develop practical skills in prototyping, automation, robotics, and emerging technologies through experiential learning activities
- Design and construct interdisciplinary engineering prototypes by integrating concepts from multiple engineering domains

## COURSE OUTCOMES:

- CO 1:** Fabricate simple components using basic mechanical engineering tools and additive manufacturing Apply
- CO 2:** Carry out electrical wiring installations applying safety measures in domestic applications Apply
- CO 3:** Interface electronic devices to develop functional engineering solutions Apply
- CO 4:** Illustrate the role of automation and artificial intelligence in engineering applications Apply
- CO 5:** Develop interdisciplinary engineering prototype addressing specific problems through teamwork and innovation Create

## LIST OF EXPERIMENTS

## MODULE 1: FABRICATION AND MAKING SKILLS (10 Hours)

1. Welding procedure, selection & safety Measures - Hands-on session for preparing base material and joining of steel materials using arc welding
2. Study on basic pipe connections with different joining components.
3. Demo on laser cutting of acrylic boards and wire arc welding

## MODULE 2: DIGITAL DESIGN AND RAPID PROTOTYPING (10 Hours)

4. 3D Modelling of simple components using software's
5. Fabrication of simple components / parts using 3D printers
6. Demonstration of assembly modelling of components

## MODULE 3: AUTOMATION AND ROBOTICS (8 Hours)

7. Demonstration on mechatronics components/systems

8. Demonstration on basic robotics system
9. Demonstration on automobiles, performance measures
10. Demonstration on programmable logic control circuit

**MODULE 4: ELECTRICAL PRACTICES (10 Hours)**

11. Study on basic electrical installation tools, equipment and safety measures
12. Basic electrical wiring and connections such as soldering, fuses, earthing, miniature circuit breakers and switch wiring
13. Hands-on session of electrical connections for lightings, fans, calling bells etc
14. Hands-on session of electrical connections for motors and uninterruptible power supply

**MODULE 5: ELECTRONICS AND EMBEDDED SYSTEMS (8 Hours)**

15. Electronic components, equipment and safety measures
16. Interfacing of sensors and actuator with microcontrollers (Arduino)
17. Integration of electronic circuits with IoT system
18. Interfacing of components with printed circuit board

**MODULE 6: ARTIFICIAL INTELLIGENCE (4 Hours)**

19. Demonstration on artificial intelligence technologies
20. Demonstration on AR/VR technologies

**MODULE 7: INTERDISCIPLINARY PROTOTYPE CHALLENGE (10 Hours)**

21. Students work in teams to develop and demonstrate an interdisciplinary product/prototype for the problem identified

**CONTACT PERIODS:**

Lecture: - Periods      Tutorial: - Periods      Practical: 60 Periods      Project: - Periods      Total: 60 Periods

## SEMESTER II

| U25RCSG06 | Python Programming Laboratory<br>(Common to all programmes) | Category: ESC |   |   |   |   |
|-----------|-------------------------------------------------------------|---------------|---|---|---|---|
|           |                                                             | L             | T | P | J | C |
|           |                                                             | 0             | 0 | 2 | 0 | 1 |

## COURSE OBJECTIVES:

- To understand the fundamental concepts of Python programming and problem-solving using Python language constructs
- To apply control structures, functions, strings, and Python collections for developing efficient applications
- To develop modular applications using file handling, exception handling, modules, and packages.
- To implement basic object-oriented programming concepts and utilize Python libraries for data analysis applications

## COURSE OUTCOMES:

- CO 1:** Implement Python programs using basic language constructs, data types, operators, and input/output operations **Apply**
- CO 2:** Develop Python programs using decision-making statements, looping constructs, functions, and recursion **Apply**
- CO 3:** Implement applications using strings, lists, tuples, sets, and dictionaries for data processing and problem solving **Apply**
- CO 4:** Develop modular applications using file handling, exception handling, modules, and packages **Apply**
- CO 5:** Design applications using basic object-oriented programming concepts and Python libraries such as NumPy and Pandas **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |

## LIST OF EXPERIMENTS

- Development of Python programs demonstrating variables, data types, operators, and input/output operations
- Implementation of applications using conditional statements and nested conditional constructs
- Development of iterative applications using for loops, while loops, and loop control statements
- Design and implementation of console-based applications for mathematical and logical problem solving
- Development of applications using user-defined functions and recursive functions
- Implementation of string processing applications using Python string operations and methods
- Development of applications using lists, tuples, sets, and dictionaries
- Implementation of applications using list comprehensions and collection-based problem solving
- Development of modular applications using built-in and user-defined modules
- Implementation of file handling applications for reading, writing, and appending data
- Development of robust applications using exception handling and user-defined exceptions

**COURSE OBJECTIVES:**

- To provide basic concepts of ecosystem, biodiversity, atmospheric and hydrological processes
- To inculcate knowledge on the lithosphere, waste management practices, environmental laws and disaster management strategies
- To apply the principles of sustainable living and green technologies in alignment with the UN Sustainable Development Goals

**COURSE OUTCOMES:**

- CO 1:** Explain the role of biodiversity conservation and wildlife protection in addressing environmental issues **Understand**
- CO 2:** Apply pollution control methods, environmental laws, and water management practices for environmental protection **Apply**
- CO 3:** Implement sustainable waste management practices for efficient resource utilization **Apply**
- CO 4:** Explain the role of disaster management, governance, and IT tools in environmental and health sustainability **Understand**
- CO 5:** Employ sustainable practices and national environmental initiatives for sustainable development **Apply**

**SYLLABUS:****UNIT I: ENVIRONMENT AND BIODIVERSITY**

6

Scope of Environmental Science – Ecology – Ecosystem – Classification, structure, productivity – Energy flow and nutrient cycles – Nitrogen cycle – Ecological succession – Biodiversity – Types and values of biodiversity – Biodiversity at Global, National and Local Levels – Bio-geographical Classification of India – India as a Mega-diversity Nation – Red Data Book – Hotspots of Indian Biodiversity – Endangered and endemic species – Conservation of biodiversity

Self - Learning & Case Studies – Species conservation projects in India – Species Reintroduction – National Biodiversity Action Plan 2015 – Role of International Union for Conservation of Nature (IUCN)

**UNIT II: ATMOSPHERE AND HYDROSPEHERE**

6

Atmosphere – Structure and composition – Earth's Albedo – Carbon cycle and oxygen cycle – Air Quality Standards – Air Pollution – Sources, effects and control measures – Indian Environmental Laws – Air Act 1981. Hydrosphere – Hydrosphere – Hydrological Cycle, Water Quality Parameters, Water Pollution – Sources, effects, and control measures - Water conservation – Rainwater harvesting, Dams, and watershed Management – Wastewater treatment, Ocean acidification, Blue economy, Water Act, 1974 and Environment Protection Act, 1986

Self - Learning & Case Studies – Clean Development Mechanism (CDM) – Greenhouse Gas Protocol – ISO 14064 – Jal Shakti Abhiyan – Implementation of CNG in NCT of Delhi – Taj Trapezium Case – Narmada River – Sardar Sarovar Project

**UNIT III: LITHOSPHERE AND SOLID WASTE MANAGEMENT**

6

Lithosphere – Structure of the lithosphere – Continental drift – Forest resources – Deforestation – Causes and effects – Agriculture – Effects of modern agriculture – Soil Pollution – Causes, effects and control measures. Solid Waste Management – Solid Waste – Sources, classification, and effects , Waste reduction strategies – Circular Economy and 5R Principles, Solid waste treatment, Disposal techniques, Refuse-Derived Fuel and Waste-to-Energy technologies, Biomedical, E-Waste and Hazardous waste management, Resource recovery – Environmental Standards and Waste Management Regulations (ISO 14001 and Waste Rules)

Self - Learning & Case Studies – Solid Waste Management rules, 2024 – Plastic Waste Management Rules (PWMR) – Degradation of Soil in Rajasthan – Indore's Waste Management System

**UNIT IV: GLOBAL ISSUES, HUMAN WELFARE AND ROLE OF TECHNOLOGY**

6

EIA- Concepts, stages – Land clearing projects – Environmental and social Impacts, Resettlement and Rehabilitation – Concepts and challenges – Disaster management – Floods, Landslides, Disaster management cycle and mitigation – Environmental Governance, Global Governance and Fundamental Human Rights – Importance. Human Population – Population growth, explosion and its challenges – Trends and variation among nations – Role of IT – Remote sensing, GIS and Google earth engine – Disease tracking and prediction using big data and AI (e.g., COVID-19 apps)

Self - Learning & Case Studies – Mission Amrit Sarovar – Beti Bachao Beti Padhao mission – Kerala Flood (2018) – Sterlite Copper Plant Case – Thoothukudi

**UNIT V: SUSTAINABLE DEVELOPMENT AND GREEN PRACTICES**

6

Sustainable Development – Concept, significance of sustainability – UN Sustainable Development Goals (UN SDGs) – Sustainability assessment – Carbon footprint, accounting, Carbon Neutrality – Net Zero Emissions – Carrying Capacity of the Earth – Carbon Sequestration and Carbon Capture – Blue Carbon and Green Carbon. Green Practices – Sustainable Agriculture – Green Energy – Biofuels, Green Hydrogen, Solar, wind and biomass Energy – Sustainable Transport – Electric Vehicles (EVs)

Self - Learning & Case Studies – National Solar Mission, Green India Mission – Ambikapur, Chhattisgarh – Zero Waste Model – Delhi Metro – Energy Efficiency and Sustainable Transport

## SEMESTER II

| U25RMCC05 | தமிழரும் தொழில்நுட்பமும் / Tamils and Technology<br>(Common to all programmes) | Category: MCC |   |   |   |   |
|-----------|--------------------------------------------------------------------------------|---------------|---|---|---|---|
|           |                                                                                | L             | T | P | J | C |
|           |                                                                                | 1             | 0 | 0 | 0 | 1 |

## COURSE OBJECTIVES:

- To learn weaving, ceramic and construction technology of Tamils
- To understand the agriculture, irrigation and manufacturing technology of Tamils
- To realize the development of scientific Tamil and Tamil computing

## COURSE OUTCOMES:

|                                                                                                    |            |
|----------------------------------------------------------------------------------------------------|------------|
| CO 1: Understand the weaving and ceramic technology of ancient Tamil people nature                 | Understand |
| CO 2: Understand the construction technology, building materials in Sangam period and case studies | Understand |
| CO 3: Infer the metal process, coin and beads manufacturing with relevant archeological evidence   | Understand |
| CO 4: Realize the agriculture methods, irrigation technology and pearl diving                      | Understand |
| CO 5: Apply the knowledge of scientific Tamil and Tamil computing                                  | Understand |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | -   | -   | -   | -   | -   | -   | 3   | 3   | -   | 2    | -    | -    | -    |
| CO 2       | -   | -   | -   | -   | -   | -   | 3   | 3   | -   | 2    | -    | -    | -    |
| CO 3       | -   | -   | -   | -   | -   | -   | 3   | 3   | -   | 2    | -    | -    | -    |
| CO 4       | -   | -   | -   | -   | -   | -   | 3   | 3   | -   | 2    | -    | -    | -    |
| CO 5       | -   | -   | -   | -   | -   | -   | 3   | 3   | -   | 2    | -    | -    | -    |

## SYLLABUS:

## UNIT I: WEAVING AND CERAMIC TECHNOLOGY

3

Weaving Industry during Sangam Age – Ceramic technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries

## UNIT II: DESIGN AND CONSTRUCTION TECHNOLOGY

3

Designing and Structural construction House & Designs in household materials during Sangam Age – Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram – Sculptures and Temples of Mamallapuram – Great Temples of Cholas and other worship places – Temples of Nayaka Period – Type study (Madurai Meenakshi Temple) – Thirumalai Nayakar Mahal – Chetti Nadu Houses, Indo-Saracenic architecture at Madras during British Period

## UNIT III: MANUFACTURING TECHNOLOGY

3

Art of Ship Building – Metallurgical studies – Iron industry – Iron smelting, steel, Copper and gold – Coins as source of history – Minting of Coins – Bead-making industries – Stone beads – Glass beads – Terracotta beads – Shell beads/ bone beads – Archeological evidences – Gem stone types described in Silappathikaram

HEAD OF THE DEPARTMENT  
Department of Information Technology  
KPR Institute of Engineering and Technology  
Arasur, Coimbatore – 641 407.

**UNIT IV: AGRICULTURE AND IRRIGATION TECHNOLOGY**

3

Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoombu of Chola Period, Animal Husbandry – Wells designed for cattle use – Agriculture and Agro Processing – Knowledge of Sea – Fisheries – Pearl – Conche diving – Ancient Knowledge of Ocean – Knowledge Specific Society

**UNIT V: SCIENTIFIC TAMIL & TAMIL COMPUTING**

3

Development of Scientific Tamil – The role of journals in the development of scientific Tamil – Scientific Tamil vocabulary – Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project

**CONTACT PERIODS:**

**Lecture:** 15 Periods      **Tutorial:** - Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 15 Periods

**TEXTBOOKS:**

1. Tamils and Technology, K. Jayanthi Ravikrishna, Sri Krishna publications, Mahalakshmi Nagar, Velappanchavadi, First Edition 2023
2. Tamils and Technology, S. Priyadharshini, V. K. Publications

**REFERENCES:**

2. Studies in the History of India with Special Reference to Tamil Nadu, Dr. K. K. Pillay, 1979

## SEMESTER II

|           |                                                                   |               |   |   |   |   |
|-----------|-------------------------------------------------------------------|---------------|---|---|---|---|
| U25RMCC07 | Professional Skill Development - II<br>(Common to all programmes) | Category: MCC |   |   |   |   |
|           |                                                                   | L             | T | P | J | C |
|           |                                                                   | 15 Hours      |   |   |   | 1 |

## COURSE OUTCOMES:

- CO 1:** Demonstrate technical skill competency through attainment of industry-relevant certifications, participation in competitions, internships, and project-based learning activities **Apply**
- CO 2:** Apply research, innovation, and problem-solving skills to develop impactful solutions through projects, publications, patents, and higher education preparation **Apply**
- CO 3:** Exhibit leadership, ethical responsibility, community engagement, and professional digital presence to enhance career readiness and lifelong learning **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 2   | -   | 3   | 1   | -   | -   | 2   | 2    | -    | 2    | 1    |
| CO 2       | 2   | 3   | 3   | 3   | 2   | 2   | -   | -   | 1   | 1    | -    | 3    | 2    |

## GUIDELINES:

- Certifications and Skill Credentials - Free awareness certs, NPTEL/Coursera, Associate-level, Professional-level, Expert-level
- Competitions, Hackathons, and Technical Challenges - Online, institution, state, national, international competitions and hackathons, Kaggle medals
- GATE Preparation and Performance - Study plan, mock tests, registration, appearing, score percentile
- Academic, Industry, and Innovation Projects - Mini-projects, intermediate projects, industry-grade deployed projects, funded or published projects
- Internships and Industrial Training - Virtual, on-site short, core role, CoE on-campus, PPO, PPO converted to offer
- Research Publications, Patents, Intellectual Property - Reading journals, survey papers, conference papers, Scopus/WoS, Q1/Q2 journals, patents from provisional to granted
- Leadership, Community, Digital Presence - Club membership, event roles, office bearer, president, outreach, LinkedIn, GitHub, portfolio, Google Scholar

## SEMESTER III

| U25MA301 | Probability and Statistical Modeling for Computing Systems<br>(Common to AD, AM, CB, CS, IT, SC) | Category: BSC |   |   |   |   |
|----------|--------------------------------------------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                                                                  | L             | T | P | J | C |
|          |                                                                                                  | 2             | 0 | 2 | 0 | 3 |

## PRE-REQUISITES:

- U25MA101 - Calculus and Differential Equations / U25RMA101 - Multivariable Calculus and Applications

## COURSE OBJECTIVES:

- To provide in-depth statistical and probability theory knowledge
- To facilitate with students, use their understanding of statistical methods for data analysis and inference in their areas of study
- To provide the knowledge of time series component analysis in their area of study

## COURSE OUTCOMES:

- CO 1:** Explain the probability concepts, and apply Bayes' rule to solve probabilistic problems and analyse discrete probability distributions **Understand**
- CO 2:** Define continuous random variables and interpret statistical data using appropriate continuous probability distributions **Apply**
- CO 3:** Illustrate and apply the concepts of two-dimensional random variables and compute covariance and correlation, and linear regression analysis **Apply**
- CO 4:** Obtain point and interval estimates, apply hypothesis testing involving means and Chi-square test for independence of attributes **Apply**
- CO 5:** Estimate the trend analysis, cyclical, seasonal and irregular variations of time series analysis in forecasting **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 2   | 1   | -   | -   | 1   | -   | -   | -   | -   | -    | -    | 1    | 1    |
| CO 2       | 3   | 2   | -   | -   | 2   | -   | -   | -   | -   | -    | -    | 1    | 1    |
| CO 3       | 3   | 2   | -   | -   | 2   | -   | -   | -   | -   | -    | -    | 1    | 1    |
| CO 4       | 3   | 2   | -   | -   | 2   | -   | -   | -   | -   | -    | -    | 2    | 2    |
| CO 5       | 3   | 2   | -   | -   | 2   | -   | -   | -   | -   | -    | -    | 2    | 2    |

## SYLLABUS:

## UNIT I: PROBABILITY AND DISCRETE RANDOM VARIABLES

6 + 6

Probability – Addition rule – Conditional probability – Baye's theorem – Discrete random variables – Mean and variance – Binomial and Poisson distributions

## UNIT II: CONTINUOUS RANDOM VARIABLES

6 + 6

Continuous random variables – Probability density functions – Cumulative distribution functions – Mean and variance – Uniform and Normal distributions

**UNIT III: JOINT PROBABILITY DISTRIBUTIONS**

**6 + 6**

Two dimensional discrete and continuous random variables – Marginal probability distribution – Independence, covariance – Correlation and linear regression analysis

**UNIT IV: STATISTICAL INFERENCE**

**6 + 6**

Estimation – Point estimation, interval estimation – Determining the sample size in estimation – Hypothesis testing – Hypotheses concerning means – Large, small samples – Chi square test for independence of attributes

**UNIT V: TIME SERIES AND FORECASTING**

**6 + 6**

Variations in Time Series – Trend Analysis – Cyclical Variation – Seasonal Variation – Irregular Variation – Time series analysis in forecasting

**LIST OF EXPERIMENTS**

1. Discrete Random Variables – Mean and Variance of discrete RVs. – Special discrete probability distributions
2. Continuous Random Variables – Mean and Variance of continuous RVs. – Special continuous probability distributions
3. Joint Probability Distributions – Marginal probability distributions. – Covariance and Correlation.
4. Inferential Statistics – Estimation theory – Testing of hypotheses
5. Time Series and Forecasting – Trend analysis in time series – Cyclic variation in forecasting

**CONTACT PERIODS:**

**Lecture:** 30 Periods      **Tutorial:** - Periods      **Practical:** 30 Periods      **Project:** - Periods      **Total:** 60 Periods

**TEXTBOOKS:**

1. Douglas C. Montgomery and George C. Runger, "Applied Statistics and Probability for Engineers", Wiley India, New Delhi, 2018
2. Richard I Levin and David S Rubin, "Statistics for Management", Pearson Education, 2005

KPR Institute of Engineering and Technology  
Arasur, Coimbatore – 641 407.

## SEMESTER III

| U25CSG09 | Computer Organization and Architecture<br>(Common to AD, AM, CB, CS, IT, SC) | Category: PCC |   |   |   |   |
|----------|------------------------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                                              | L             | T | P | J | C |
|          |                                                                              | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- To learn the basic structure and operations of a computer
- To learn the arithmetic and logic unit and implementation of fixed-point and floating-point arithmetic unit
- To learn the basic of pipelined execution
- To understand the memory hierarchies, cache memories and virtual memories
- To learn the different ways of communication with I/O devices

## COURSE OUTCOMES:

- CO 1:** Describe the various parts of modern computer functional units, bus structure, addressing modes and Understand Computer arithmetic
- CO 2:** Use instruction execution steps including timing, control, and register transfer to solve datapath problems Apply
- CO 3:** Implement pipeline operations and hazard resolution methods to assess system performance Apply
- CO 4:** Explain the memory system components and their performance factors Understand
- CO 5:** Describe input output operations, interrupt handling and data transfer methods in computer systems Understand

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | 1    | 2    | 1    |
| CO 2       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 1    |
| CO 3       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 1    |
| CO 4       | 2   | 1   | -   | -   | 1   | -   | -   | -   | -   | -    | 1    | 2    | 1    |
| CO 5       | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | 1    | 2    | 1    |

## SYLLABUS:

## UNIT I: INTRODUCTION

9

Evolution of computers – Structure of computers – Basic Operational Concepts–GPR based and stack-based organization – Bus Structures, Performance Measurement – Processor Clock, Basic Performance Equation, Clock Rate – Machine Instructions and Programs – Memory Location and Addresses, Memory Operation–Instructions and Instruction Sequencing – Addressing Modes

## UNIT II: DATAPATH AND CONTROL

9

Fetching and Storing words – Register Transfer – Execution of instruction – Instruction codes – computer registers – computer instructions – timing & control –instruction cycle –memory reference instructions – Hard-wired Control – Micro programmed Control – Micro instruction – Microprogram sequencing

## UNIT III: PIPELINING

9

Basic concepts of pipelining – the instruction pipeline – pipeline hazards – instruction level parallelism – Reduced Instruction Set – Computer principles – RISC versus CISC

**UNIT IV: MEMORY SYSTEM**

9

Basic Concepts – Semiconductor RAM Memories – Read Only Memories – Speed, Size, and Cost – Cache Memories – Mapping Functions – Replacement Algorithms – page mode access – interleaved access – Performance Considerations – Virtual Memories – Secondary Storage

**UNIT V: INPUT/OUTPUT ORGANIZATION**

9

Accessing I/O Devices – Interrupts – Interrupt Hardware – Enabling and Disabling Interrupts – Handling Multiple Devices – Controlling Device Requests – Exceptions – Direct Memory Access – Buses – Interface Circuits – Standard I/O Interfaces – PCI Bus – SCSI Bus, Bus – Arbitration schemes – USB

**CONTACT PERIODS:**

**Lecture:** 45 Periods      **Tutorial:** - Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 45 Periods

**TEXTBOOKS:**

## SEMESTER III &amp; IV

| U25CSG11 | Object Oriented Programming Using Java<br>(Common to AD, AM, BM, CB, CS, EC, EE, IT, MI, SC) | Category: PCC |   |   |   |   |
|----------|----------------------------------------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                                                              | L             | T | P | J | C |
|          |                                                                                              | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- To introduce object-oriented programming concepts and Core Java programming fundamentals
- To develop Java applications using classes, inheritance, polymorphism, interfaces, and exception handling mechanisms
- To provide programming skills in multithreading, collections framework, and file handling using Java APIs
- To enable students to develop modular and reusable Java applications using standard libraries and object-oriented design principles

## COURSE OUTCOMES:

- CO 1:** Describe object-oriented programming concepts and Java fundamentals for developing simple applications **Understand**
- CO 2:** Develop Java applications using inheritance, polymorphism, abstract classes, interfaces, and packages **Apply**
- CO 3:** Develop Java programs incorporating exception handling and multithreading concepts **Apply**
- CO 4:** Develop Java applications using collections, generics, and related utility classes **Apply**
- CO 5:** Develop Java applications using file handling, stream processing, and object serialization techniques **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 2   | 1   | 1   | 1   | -   | -   | -   | -   | -   | -    | -    | 3    | 3    |
| CO 2       | 3   | 2   | 2   | 2   | -   | -   | -   | -   | -   | -    | 1    | 3    | 3    |

## SYLLABUS:

## UNIT I: INTRODUCTION TO OBJECT-ORIENTED PROGRAMMING AND JAVA BASICS

9

Procedure-Oriented vs Object-Oriented Java Features and Platform: JVM, JRE, JDK – Java Program Structure & Memory Layout – Classes and Objects – Static and non-static members, static and non-static Methods, Constructors – Access Modifiers, Abstraction and Encapsulation – Scanner and System classes

## UNIT II: INHERITANCE AND POLYMORPHISM

9

Inheritance and types – Polymorphism: Method Overloading and Overriding – Abstract Classes and Methods – Interfaces. Java packages : Built in and user defined packages

## UNIT III: EXCEPTION HANDLING AND MULTITHREADING

9

Exception Handling: try, catch, throw, throws, finally – Built in exception classes and User defined Exceptions – Multithreading: Thread Lifecycle, Creating Threads, Thread Class and Runnable Interface, Thread Priorities, Synchronization – Inter-thread Communication, Deadlock prevention

**UNIT IV: COLLECTIONS FRAMEWORK AND GENERICS**

9

Collections Framework – Generics and Type Safety – Wrapper Classes and Autoboxing/Unboxing – Interfaces and Classes: List, Set, Map, Queue – Implementations: ArrayList, LinkedList, HashSet, TreeSet, HashMap, TreeMap – Iterators – Comparator and Comparable Interfaces

**UNIT V: JAVA I/O AND FILES**

9

Java I/O Framework – Input and Output Streams – Readers and Writers – File I/O using File, FileReader, FileWriter, BufferedReader, BufferedWriter and Files – Console Input using Scanner and Console – Serialization and Deserialization – Object Streams

**CONTACT PERIODS:**

**Lecture:** 45 Periods      **Tutorial:** - Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 45 Periods

**TEXTBOOKS:**

1. Herbert Schildt, "Java: The Complete Reference", 11th Edition, McGraw Hill Education, 2018
2. Cay S. Horstmann and Gary Cornell, "Core Java 2, Vol 1, Fundamentals", 11th Edition, Pearson Education, 2020

## SEMESTER III

| U25CSG12 | Data Structures<br>(Common to AM, CB, CS, IT, SC) | Category: PCC |   |   |   |   |
|----------|---------------------------------------------------|---------------|---|---|---|---|
|          |                                                   | L             | T | P | J | C |
|          |                                                   | 2             | 0 | 4 | 0 | 4 |

## PRE-REQUISITES:

- U21CSG01 - Problem Solving and C Programming

## COURSE OBJECTIVES:

- To appreciate the concepts of ADT and list operations
- To study linear data structures – stacks and queues
- To familiarize tree and Graph structures

## COURSE OUTCOMES:

|       |                                                                                                       |       |
|-------|-------------------------------------------------------------------------------------------------------|-------|
| CO 1: | Demonstrate the implementation of list-based linear data structures in data organization applications | Apply |
| CO 2: | Utilize stack and queue data structures to solve expression evaluation and process-handling problems  | Apply |
| CO 3: | Apply searching, sorting, and hashing techniques for efficient data organization and retrieval        | Apply |
| CO 4: | Employ tree structures and algorithms for hierarchical data representation and processing             | Apply |
| CO 5: | Use graph algorithms for traversal, shortest path, and minimum spanning tree problems                 | Apply |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 2       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 3       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 4       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 5       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |

## SYLLABUS:

## UNIT I: LINEAR DATA STRUCTURES – LIST

6 + 12

Abstract Data Types (ADTs) – List ADT – Array-based implementation – Linked list-based implementation – Singly linked lists – Circularly linked lists – Doubly-linked lists – Applications of linked list: Polynomial ADT, Radix sort, Multilist

## UNIT II: LINEAR DATA STRUCTURES – STACKS, QUEUES

6 + 12

Stack ADT – Operations – Applications – Balancing Symbols-Evaluating arithmetic expressions – Conversion of Infix to postfix expression-Function Calls – Queue ADT – Operations – Circular Queue – DeQueue – Applications of queues.

## UNIT III: SEARCHING, SORTING, AND HASHING TECHNIQUES

6 + 12

Sorting: Bubble sort – Insertion sort – Shell sort – Searching: Linear Search – Binary Search – Hashing – Hash Functions – Separate Chaining – Open Addressing – Rehashing – Extendible Hashing

**UNIT IV: NON-LINEAR DATA STRUCTURES – TREES**

6 + 12

Tree ADT – Tree traversals – Binary Tree ADT – Expression trees – Binary search tree ADT – AVL Trees – Priority Queue – Binary Heap – Applications of trees

**UNIT V: NON-LINEAR DATA STRUCTURES – GRAPHS**

6 + 12

Introduction to Graph – Types of graph – Representation of graphs – Graph traversal : Breadth-first traversal – Depth-first traversal – Bi-Connectivity – Euler circuits – Topological Sort – Dijkstra's algorithm – Minimum spanning tree algorithms – Prims algorithm – Kruskal Algorithm

**LIST OF EXPERIMENTS**

1. Implement a music playlist where songs can be added, removed, or moved up/down dynamically using linked list
2. Create a stack to manage "Back" and "Forward" operations in a browser, or evaluate arithmetic expressions
3. Simulate customers arriving and being served at a bank counter using Queue ADT
4. Implement bubble sort and Insertion sort
5. Implement Shell sort algorithm
6. Implement Linear search and Binary search algorithms
7. Implement a hash function to Store and search books by ISBN or title efficiently
8. Represent a file system as a tree and allow insertion/deletion of folders/files and implement tree traversal for the same
9. Represent cities and roads as a graph and find shortest paths using Dijkstra's algorithm
10. Implement prims algorithm to find minimum spanning tree of a given graph

**CONTACT PERIODS:**

**Lecture:** 30 Periods      **Tutorial:** - Periods      **Practical:** 60 Periods      **Project:** - Periods      **Total:** 90 Periods

**TEXTBOOKS:**

1. Reema Thareja, "Data Structures Using C", 1st edition, Oxford University Press, 2018
2. Ellis Horowitz, Sartaj Sahni and Susan Anderson-Freed, "Fundamentals of Data Structures in C", 2nd edition, University Press, 2017

**REFERENCES:**

## SEMESTER III &amp; IV

| U25CSG16 | Database Management Systems<br>(Common to AD, AM, CB, CS, IT, SC) | Category: PCC |   |   |   |   |
|----------|-------------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                                   | L             | T | P | J | C |
|          |                                                                   | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- To understand the fundamental concepts and architecture of database systems and design database schemas using appropriate data models
- To develop database applications using SQL and PL/SQL and apply database design principles such as normalization and transaction management
- To explore storage structures, indexing, and query optimization techniques and understand NoSQL database models for developing modern database applications using MongoDB

## COURSE OUTCOMES:

|                                                                                                              |            |
|--------------------------------------------------------------------------------------------------------------|------------|
| CO 1: Explain database fundamentals and design database schemas using the ER model                           | Understand |
| CO 2: Construct database applications and perform CRUD operations using SQL and advanced SQL features        | Apply      |
| CO 3: Implement normalization and transaction management techniques to ensure data integrity and consistency | Apply      |
| CO 4: Utilize indexing, hashing, and query processing techniques to improve data retrieval efficiency        | Apply      |
| CO 5: Develop NoSQL database solutions using modern data models for data-driven applications                 | Apply      |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | 1    | 1    | 1    |
| CO 2       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 3    | 2    | 2    |
| CO 3       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 3    | 2    | 2    |
| CO 4       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 2    | 2    | 2    |
| CO 5       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 2    | 3    | 3    |

## SYLLABUS:

## UNIT I: DATABASE CONCEPTS AND DATA MODELING

9

Introduction to DBMS – Database System Architecture – Levels of Abstraction – Views of data – Data Models – DBMS vs RDBMS – Relational Model: Relational Databases – Keys – Integrity Constraints – Relational Algebra – ER Model: Entities – Attributes – Relationships – ER diagrams – Mapping ER model to Relational tables

## UNIT II: SQL FUNDAMENTALS

9

SQL: Data Types – Types of SQL Commands – Operators – Clauses – Aggregate Functions – Joins – Nested Queries – Set Operations – Condition Logic – Advanced SQL: Views – PL/ SQL: Functions – Cursor – Exception Handling – Stored Procedures – Triggers

**UNIT III: DATABASE DESIGN AND PROCESSING**

9

Normalization: Functional Dependencies – Lossy/Lossless Decomposition – Dependency preservation – 1NF,2NF,3NF – BCNF – 4NF, 5NF – Transaction: Transaction Concepts and States – ACID Properties – Schedules – Serializability – Concurrency control – Locking protocols – Deadlock – Transaction recovery

**UNIT IV: DATABASE STORAGE AND INDEXING**

9

RAID Levels – File Organization – Data dictionary Storage – Indexing and Hashing: Ordered Indices – B tree Index – B+ tree Index – Static Hashing – Dynamic Hashing – Querying Processing and optimization

**UNIT V: NOSQL DATABASES**

9

NoSQL: Need for NoSQL – Characteristics and Applications – CAP Theorem – BASE vs ACID – NoSQL vs SQL– Types of NoSQL: Key-Value database – Document database – Column-Oriented database – Graph Database – MongoDB: Data Model and Architecture – CRUD Operations – Indexing and aggregation

**CONTACT PERIODS:**

**Lecture:** 45 Periods      **Tutorial:** - Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 45 Periods

**TEXTBOOKS:**

1. A. Silberschatz, H. F. Korth and S. Sudarshan, "Database System Concepts", 7th edition, McGraw-Hill, 2019
2. Ramez Elmasri and Shamkant B. Navathe, "Fundamentals of Database Systems", 8th edition, Pearson, 2026

**REFERENCES:**

## SEMESTER III

| U25ITG01 | Software Engineering<br>(Common to AM, IT) | Category: PCC |   |   |   |   |
|----------|--------------------------------------------|---------------|---|---|---|---|
|          |                                            | L             | T | P | J | C |
|          |                                            | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- To understand core software engineering concepts, including process models and requirement engineering techniques.
- To apply design principles, architecture methods, and coding standards to build efficient, maintainable software systems.
- To ensure software quality through testing techniques and understand quality assurance, configuration management, and maintenance processes.

## COURSE OUTCOMES:

- CO 1:** Implement the software engineering principles and various software process models to select appropriate models for different types of software projects **Apply**
- CO 2:** Examine the software requirements using requirement engineering techniques and modelling approaches to produce effective requirement specifications. **Apply**
- CO 3:** Construct the software design principles, architectural design methods, and coding standards to develop efficient and maintainable software systems. **Apply**
- CO 4:** Implement the software testing techniques and strategies to assess the quality and reliability of software systems. **Apply**
- CO 5:** Use the software quality assurance practices, configuration management, and maintenance processes to ensure continuous improvement of software products. **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 2   | 2   | 1   | -   | -   | -   | 1   | 2    | 1    | 2    | 2    |
| CO 2       | 3   | 3   | 2   | 2   | 1   | -   | -   | -   | 1   | 2    | 1    | 2    | 2    |
| CO 3       | 2   | 3   | 3   | 2   | 1   | -   | -   | -   | 1   | 2    | 1    | 2    | 2    |
| CO 4       | 2   | 3   | 2   | 2   | 1   | -   | -   | -   | 1   | 2    | 1    | 2    | 2    |
| CO 5       | 2   | 2   | 2   | 2   | 1   | -   | -   | -   | 1   | 2    | 1    | 2    | 2    |

## SYLLABUS:

## UNIT I: SOFTWARE PROCESS

9

Evolution of Software – Software Engineering- Software Characteristics and Applications – Generic Software Process Framework – Software Process Model: Linear Sequential Model – Waterfall Model – Prototyping Model – Iterative Enhancement Model - Spiral Model – Rapid Application Development Model – Agile Process Models: Agile Principles- Extreme Engineering – Scrum

## UNIT II: REQUIREMENT ENGINEERING

9

Requirement Engineering – Functional and Non- Functional Requirements- User and System Requirements –Requirement Elicitation Techniques – Requirement Analysis – Modeling Approaches: Scenario based Modeling – Use Case Modeling – Class based Modeling – Behavioral Modeling – Software Requirement Specification (SRS) Document Requirements Validation and Management.

**UNIT III: SOFTWARE DESIGN AND CODING**

9

Design concepts: Abstraction -Refinement – Modularity – Functional Independence – Coupling and Cohesion – Architectural Design – Design Strategies: Top-down and Bottom-Up design – Object-Oriented Concepts: Object-oriented Analysis – Object-Oriented Design (OOD) – Software Design Document – Coding Practices: coding Standards – Documentation – Refactoring.

**UNIT IV: SOFTWARE TESTING**

9

Software Testing Fundamentals – Test Case Design Techniques – Testing Methods:White Box Testing- Black Box Testing – Levels of Testing: Unit Testing – Integration Testing – System Testing- Validation Testing – Specialized Testing: User Interface Testing – Configuration Testing – Security Testing – Performance Testing

**UNIT V: SOFTWARE QUALITY ASSURANCES**

9

Software Quality Concepts – Cost of quality- Software Quality Assurance(SQA) – Quality Standards and Models - Software Configuration Management (SCM): SCM Process – Version Control – Software Maintenance – Computer Aided Software Engineering (CASE) Tools : Introduction – Upper CASE and Lower Case Tools – Software process environment

**CONTACT PERIODS:**

**Lecture:** 45 Periods      **Tutorial:** - Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 45 Periods

**TEXTBOOKS:**

## SEMESTER III &amp; IV

| U25CSG13 | Object Oriented Programming Using Java Laboratory<br>(Common to AD, AM, BM, CB, CS, EC, EE, IT, MI, SC) | Category: PCC |   |   |   |   |
|----------|---------------------------------------------------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                                                                         | L             | T | P | J | C |
|          |                                                                                                         | 0             | 0 | 2 | 0 | 1 |

## COURSE OBJECTIVES:

- To understand the fundamental concepts of object-oriented programming using Java for developing modular and reusable applications
- To apply inheritance, polymorphism, exception handling, and multithreading concepts in developing robust Java applications
- To develop collection-based and file-processing applications using Java I/O, generics, and collections framework for real-world problem solving

## COURSE OUTCOMES:

- CO 1:** Implement the fundamental concepts of object-oriented programming, Java program structure, classes, objects, and encapsulation principles **Apply**
- CO 2:** Develop Java applications using inheritance, polymorphism, abstract classes, interfaces, and packages **Apply**
- CO 3:** Implement exception handling and multithreading mechanisms for developing reliable and concurrent applications **Apply**
- CO 4:** Utilize collections framework, generics, and sorting mechanisms for efficient data management and processing **Apply**
- CO 5:** Develop file handling and object persistence applications using Java I/O streams, serialization, and deserialization techniques **Apply**

## LIST OF EXPERIMENTS

- Design and implementation of Java programs demonstrating classes, objects, constructors, and methods
- Development of applications illustrating static and non-static members, access modifiers, abstraction, and encapsulation
- Implementation of console-based applications using Scanner and System classes for input and output processing
- Design and implementation of applications demonstrating inheritance and its various types
- Development of applications illustrating compile-time and runtime polymorphism using method overloading and method overriding
- Implementation of applications using abstract classes, interfaces, and dynamic method dispatch mechanisms
- Design and development of modular Java applications using built-in and user-defined packages
- Implementation of robust exception handling mechanisms using built-in and user-defined exceptions
- Development of multithreaded applications using Thread class and Runnable interface

  
HEAD OF THE DEPARTMENT

 Department of Information Technology  
 KPR Institute of Engineering and Technology  
 Arasur, Coimbatore - 645 407.

10. Design and implementation of synchronized multithreaded applications with inter-thread communication
11. Development of applications demonstrating thread lifecycle management and deadlock prevention techniques
12. Implementation of generic collection-based applications using List, Set, Map, and Queue interfaces
13. Design of applications utilizing Comparator and Comparable interfaces for customized sorting operations
14. Development of file processing applications using Java I/O streams, readers, writers, and buffered streams
15. Implementation of object persistence mechanisms using serialization and deserialization techniques

**CONTACT PERIODS:**

## COURSE OBJECTIVES:

- To provide hands-on experience in creating and manipulating databases using SQL commands
- To practice database programming concepts including procedures, functions, triggers, and indexing
- To familiarize students with NoSQL databases and the development of simple database applications

## COURSE OUTCOMES:

|                                                                                                              |       |
|--------------------------------------------------------------------------------------------------------------|-------|
| CO 1: Construct database schemas using Data Definition Language (DDL) commands                               | Apply |
| CO 2: Construct database schemas using Data Definition Language (DDL) commands                               | Apply |
| CO 3: Develop database programs using PL/SQL constructs such as procedures, functions, cursors, and triggers | Apply |
| CO 4: Build document-based databases and execute CRUD operations using MongoDB                               | Apply |
| CO 5: Develop a simple database application by integrating a programming language with a relational database | Apply |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 1   | 1   | 2   | -   | -   | -   | 2   | 2    | 2    | 1    | 1    |
| CO 2       | 3   | 2   | 1   | 1   | 2   | -   | -   | -   | 2   | 2    | 2    | 1    | 1    |
| CO 3       | 3   | 2   | 1   | 1   | 2   | -   | -   | -   | 2   | 2    | 2    | 2    | 2    |
| CO 4       | 3   | 2   | 1   | 1   | 3   | -   | -   | -   | 2   | 2    | 2    | 2    | 2    |
| CO 5       | 3   | 2   | 1   | 1   | 3   | -   | -   | -   | 2   | 2    | 2    | 2    | 2    |

## LIST OF PROJECTS

- Design an ER Diagram for a real-world application (Library /Ecommerce/ College/ Bank / Hospital Management System)
- Create the relational schema & Implement DDL with Integrity Constraints
- Implementation of DML, DCL Commands
- Implementation of Clauses and Operators
- Implementation of Date and String Functions
- Implementation of Aggregate Functions and Grouping Operations
- Implementation of SQL Queries using Joins, Set Operations, and Views
- Implementation of Functions and Procedures
- Implementation of Triggers using PL/SQL
- Implementation of Cursors and Exception Handling
- Implement Indexing, query optimization techniques and simulate B Tree and B+ Tree
- Create a database using MongoDB and perform CRUD operations
- Develop a Database Application by integrating Java with MYSQL and perform CRUD operations

## CONTACT PERIODS:

Lecture: - Periods

Tutorial: - Periods

Practical: 30 Periods

Project: 30 Periods

Total: 60 Periods

## SEMESTER III

| U25MNC02 | Essence of Indian Traditional Knowledge<br>(Common to all programmes) | Category: MNC |   |   |   |   |
|----------|-----------------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                                       | L             | T | P | J | C |
|          |                                                                       | 1             | 0 | 0 | 0 | 0 |

## COURSE OBJECTIVES:

- Understand the Concept of culture in ancient, medieval and modern period.
- Know the need and importance of Indian languages and Literature.
- Understand the various religion and philosophy in various periods.

## COURSE OUTCOMES:

|                                                                   |            |
|-------------------------------------------------------------------|------------|
| CO 1: Understand Philosophy of Indian culture                     | Understand |
| CO 2: Distinguish the Indian languages and literature.            | Understand |
| CO 3: Learn the philosophy of ancient, medieval and modern Indian | Remember   |
| CO 4: Acquire the information about the fine arts in India        | Apply      |
| CO 5: Know the contribution of scientists different eras          | Understand |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | -   | 2   | -   | 1   | -   | -   | 3   | -   | -   | -    | -    | -    | -    |

| CO 3       | -   | 2   | -   | 1   | -   | -   | 3   | -   | -   | -    | -    | -    | -    |
| CO 4       | -   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    |
| CO 5       | -   | 2   | -   | 1   | -   | -   | 3   | -   | -   | -    | -    | -    | -    |

## SYLLABUS:

|                                                                                                                                                                                                                                                                                                                                                             |   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| <b>UNIT I: INTRODUCTION TO CULTURE</b>                                                                                                                                                                                                                                                                                                                      | 5 |
| Culture, Civilization, Culture and heritage, General characteristics of culture, Importance of culture in human literature, Indian culture, Ancient India, Medieval India, Modern India                                                                                                                                                                     |   |
| <b>UNIT II: INDIAN LANGUAGES AND LITERATURE</b>                                                                                                                                                                                                                                                                                                             | 5 |
| Indian Languages and Literature-I: The role of Sanskrit, Significance of scriptures to current society, Indian philosophies, other Sanskrit literature, Literature of south India Indian Languages and Literature-II: Northern Indian Languages & literature, Temples and Temple types, Sculptors' specialties, Temples Individualities Festivals and hopes |   |
| <b>UNIT III: RELIGION AND PHILOSOPHY</b>                                                                                                                                                                                                                                                                                                                    | 5 |
| Religion and Philosophy in ancient India, Religion and Philosophy in Medieval India, Religious Reform Movements in Modern India (Selected Movements only)                                                                                                                                                                                                   |   |

**UNIT IV: ARTS, SCIENCE, TECHNOLOGY& ENGINEERING IN INDIA**

5

Indian painting, Handicrafts, Music, Divisions of Indian classical music, Modern Indian music, Dance and drama, Indian architecture (ancient, medieval and modern), Science and technology in India, Development of science in different periods, Sushruta and Charaka, sages of South India, herbal treatments, Surgery methods of healers, Yoga and pranayama practices, Herbal usages and medication-making methods.

**UNIT V: EDUCATION SYSTEM IN INDIA**

5

Education in ancient, Medieval and modern India, Aims of education, subjects, languages, science and scientists of Ancient India, Medieval India and Modern India

**CONTACT PERIODS:**

**Lecture:** 25 Periods      **Tutorial:** - Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 25 Periods

**TEXTBOOKS:**

## SEMESTER III

|           |                                                                    |               |   |   |   |   |
|-----------|--------------------------------------------------------------------|---------------|---|---|---|---|
| U25RMCC08 | Professional Skill Development - III<br>(Common to all programmes) | Category: MCC |   |   |   |   |
|           |                                                                    | L             | T | P | J | C |
|           |                                                                    | 15 Hours      |   |   |   | 1 |

## COURSE OUTCOMES:

- CO 1:** Demonstrate technical skill competency through attainment of industry-relevant certifications, participation in competitions, internships, and project-based learning activities **Apply**
- CO 2:** Apply research, innovation, and problem-solving skills to develop impactful solutions through projects, publications, patents, and higher education preparation **Apply**
- CO 3:** Exhibit leadership, ethical responsibility, community engagement, and professional digital presence to enhance career readiness and lifelong learning **Apply**

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|

## GUIDELINES:

- Certifications and Skill Credentials - Free awareness certs, NPTEL/Coursera, Associate-level, Professional-level, Expert-level
- Competitions, Hackathons, and Technical Challenges - Online, institution, state, national, international competitions and hackathons, Kaggle medals
- GATE Preparation and Performance - Study plan, mock tests, registration, appearing, score percentile
- Academic, Industry, and Innovation Projects - Mini-projects, intermediate projects, industry-grade deployed projects, funded or published projects
- Internships and Industrial Training - Virtual, on-site short, core role, CoE on-campus, PPO, PPO converted to offer
- Research Publications, Patents, Intellectual Property - Reading journals, survey papers, conference papers, Scopus/WoS, Q1/Q2 journals, patents from provisional to granted
- Leadership, Community, Digital Presence - Club membership, event roles, office bearer, president, outreach, LinkedIn, GitHub, portfolio, Google Scholar

 Arasur, Coimbatore – 641 407.

## SEMESTER IV

| U25MA401 | Discrete Mathematics<br>(Common to AD, AM, CB, CS, IT, SC) | Category: BSC |   |   |   |   |
|----------|------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                            | L             | T | P | J | C |
|          |                                                            | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- To develop logical reasoning and combinatorial counting skills including recurrence relations and induction
- To introduce the concepts of algebraic structures and graph theory concepts with matrix representations
- To facilitate the students to use fundamental principles of discrete structures in their respective field

## COURSE OUTCOMES:

|                                                                                                    |       |
|----------------------------------------------------------------------------------------------------|-------|
| CO 1: Apply logical connectives, truth tables, and quantifiers to validate propositions            | Apply |
| CO 2: Apply counting principles and solve linear recurrence relations using mathematical induction | Apply |
| CO 3: Classify algebraic structures (semigroups, monoids, groups) and analyse subgroup properties  | Apply |
| CO 4: Apply graph terminology, matrix representations, and identify Euler/Hamilton paths           | Apply |
| CO 5: Apply Boolean algebra and Karnaugh maps to minimize Boolean expressions                      | Apply |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |
| CO 2       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |
| CO 3       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |
| CO 4       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |
| CO 5       | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    |

## SYLLABUS:

## UNIT I: LOGIC AND PROOFS

9

Propositions – Logical connectives, truth tables, prepositional equivalences – Tautology and contradiction – Predicates and quantifiers – Rules of inference – Methods of proofs

## UNIT II: COMBINATORICS

9

Basics of counting – Sum rule, product rule – Pigeonhole principle – permutations and combinations – Recurrence relations – Linear homogeneous recurrence relations – Mathematical induction

## UNIT III: ALGEBRAIC STRUCTURES

9

Relation and function – Types and properties, algebraic structures – Semigroups, monoids, groups, and abelian groups – Subgroups and their properties – Applications

## UNIT IV: GRAPH THEORY

9

Introduction to graphs and graph models – Graph terminology and types of graphs, complete, bipartite and regular graphs – Matrix representation of graphs and adjacency matrix – Graph isomorphism – Connectivity, paths, circuits and connected components – Euler and Hamilton graphs

**UNIT V: BOOLEAN ALGEBRA**

9

Boolean algebra and basic postulates – Principle of duality – Canonical forms of Boolean expressions– Karnaugh map and Minimization techniques – Applications

**CONTACT PERIODS:**

**Lecture:** 45 Periods      **Tutorial:** - Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 45 Periods

**TEXTBOOKS:**

## SEMESTER IV

| U25IT401 | Fundamentals of Data Communication | Category: ESC |   |   |   |   |
|----------|------------------------------------|---------------|---|---|---|---|
|          |                                    | L             | T | P | J | C |
|          |                                    | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- To understand the basic concepts of data communication, network standards, and transmission techniques
- To learn various transmission methods, error control methods, and switching techniques
- To know the principles of multiplexing, data compression, and security mechanisms for reliable communication

## COURSE OUTCOMES:

|       |                                                                                        |            |
|-------|----------------------------------------------------------------------------------------|------------|
| CO 1: | Understand the fundamentals of data communication and network standards                | Understand |
| CO 2: | Explain various transmission methods, encoding, and modulation techniques              | Understand |
| CO 3: | Implement suitable error detection and correction techniques for reliable transmission | Apply      |
| CO 4: | Utilize multiplexing and switching techniques for effective communication              | Apply      |
| CO 5: | Demonstrate compression and basic security methods for efficient data transfer         | Apply      |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |

## SYLLABUS:

## UNIT I: INTRODUCTION TO DATA COMMUNICATION

9 + 6

Components of a Data Communication System – Data Flow – Network: Network Criteria – Physical Structures – Networks Types – Protocol Layering – Data Communication Standards and Protocols – Analog and Digital Signals – Data Transmission Methods: Serial – Parallel – Asynchronous and Synchronous Transmission – Signal Impairment

## UNIT II: DATA ENCODING AND MODULATION

9 + 6

Concept of Analog and Digital Transmission – Nyquist and Shannon Capacity Theorems – Line Encoding Schemes – Digital Modulation Techniques: ASK – FSK – PSK – Analog Modulation Techniques: AM – FM – PM – Sampling Theorem and Quantization – Pulse Code Modulation (PCM) and Delta Modulation

## UNIT III: ERROR DETECTION AND CORRECTION

9 + 6

Types of Errors – Linear Block Codes and Code word Concepts – Hamming Codes – Forward Error Correction – Forward Error-Correcting Codes: Cyclic Codes – BCH Codes – Reed-Solomon Codes – Parity-Check Matrix Codes

HEAD OF THE DEPARTMENT

Department of Information Technology

KPR Institute of Engineering and Technology

Arasur, Coimbatore – 641 407.

**UNIT IV: MULTIPLEXING AND SWITCHING NETWORK**

9 + 6

Multiplexing Techniques: FDM – TDM – CDM – WDM – Spread Spectrum: FHSS – DSSS – Elements of a Switching System – Circuit Switching – Packet Switching – Message Switching – Virtual Circuits and Datagram Networks – Performance: Delay – Throughput – Packet Loss

**UNIT V: DATA COMPRESSION AND SECURITY BASICS**

9 + 6

Needs of Data Compression – Lossless Compression: Run-length Coding – Dictionary Coding – Huffman Coding – Lossy Compression: Predictive Coding – Transform Coding – Basics of Cryptography and Network Security: Security Goals – Attacks – Symmetric-Key Ciphers: General structure of DES – Asymmetric-Key Ciphers: RSA Cryptosystem – Public Key Infrastructure (PKI) – Firewalls – VPNs

## SEMESTER IV

| U25CSG15 | Design And Analysis of Algorithms<br>(Common to AM, CB, CS, IT, SC) | Category: PCC |   |   |   |   |
|----------|---------------------------------------------------------------------|---------------|---|---|---|---|
|          |                                                                     | L             | T | P | J | C |
|          |                                                                     | 3             | 1 | 0 | 0 | 4 |

## COURSE OBJECTIVES:

- To understand the fundamental concepts of algorithms and analyze their efficiency using asymptotic notations
- To study algorithm design techniques such as brute force and divide-and-conquer
- To develop solutions using dynamic programming and greedy methods
- To analyze graph algorithms, flow networks, and string matching techniques
- To explore backtracking, branch and bound methods, and complexity classes such as P and NP

## COURSE OUTCOMES:

|       |                                                                                                                                 |         |
|-------|---------------------------------------------------------------------------------------------------------------------------------|---------|
| CO 1: | Analyze algorithm efficiency using asymptotic notations and mathematical analysis techniques                                    | Analyze |
| CO 2: | Implement brute force and divide-and-conquer strategies to solve computational problems                                         | Apply   |
| CO 3: | Construct optimal solutions using dynamic programming and greedy algorithms                                                     | Apply   |
| CO 4: | Utilize optimization techniques and graph-based algorithms to solve computational problems.                                     | Apply   |
| CO 5: | Investigate combinatorial optimization problems using backtracking and branch-and-bound techniques and assess NP-class problems | Analyze |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 2       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 3       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 4       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 5       | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |

## SYLLABUS:

## UNIT I: INTRODUCTION

9 + 3

Notion of an Algorithm – Fundamentals of Algorithmic Problem Solving – Important Problem Types – Fundamentals of the Analysis of Algorithm Efficiency – Analysis Framework – Asymptotic Notations and its properties – Mathematical analysis for Recursive and Nonrecursive algorithms

## UNIT II: BRUTE FORCE AND DIVIDE &amp; CONQUER

10 + 3

Brute Force: Selection sort, Bubble Sort, Sequential Search, String Matching, Closest - Pair and Convex - Hull Problems – Traveling Salesman Problem – Knapsack Problem – Assignment problem. Divide and conquer methodology: Merge sort – Quick sort – Binary search

## UNIT III: DYNAMIC PROGRAMMING AND GREEDY TECHNIQUE

9 + 3

Dynamic Programming: Computing a Binomial Coefficient – Warshall's and Floyd's algorithm – Optimal Binary Search Trees – Knapsack Problem and Memory functions. Greedy Technique Prim's algorithm – Kruskal's Algorithm – Dijkstra's Algorithm

**UNIT IV: ITERATIVE IMPROVEMENT**

8 + 3

The Simplex Method – The Maximum Flow Problem – Maximum Matching in Bipartite Graph – Stable Marriage Problem – Local Search Heuristics: Hill Climbing

**UNIT V: BACKTRACKING AND BRANCH & BOUND**

9 + 3

Limitations of Algorithm – Lower-Bound Arguments – Decision Trees – P, NP and NP – Complete Problems – Coping with the Limitations – Backtracking: n - Queens problem – Hamiltonian Circuit Problem – Subset Sum Problem – Branch and Bound: Assignment problem – Knapsack Problem – Traveling Salesman Problem – Approximation Algorithms for NP Hard Problems

**CONTACT PERIODS:**

**Lecture:** 45 Periods      **Tutorial:** 15 Periods      **Practical:** - Periods      **Project:** - Periods      **Total:** 60 Periods

**TEXTBOOKS:**

## SEMESTER IV

| U25CSG17 | Operating Systems<br>(Common to AD, AM, CB, CS, IT, SC) | Category: PCC |   |   |   |   |
|----------|---------------------------------------------------------|---------------|---|---|---|---|
|          |                                                         | L             | T | P | J | C |
|          |                                                         | 2             | 0 | 2 | 0 | 3 |

## COURSE OBJECTIVES:

- To explore the structure, functions, and evolution of modern operating systems across various architectures and process management concepts
- To study memory and deadlock management techniques for efficient resource utilization
- To explore file systems, storage management, and modern virtualization technologies such as RAID, virtual machines, and hypervisors

## COURSE OUTCOMES:

- CO 1: Describe the structure, functions, and architectural models of modern operating systems Understand
- CO 2: Utilize process management concepts such as scheduling, multithreading, synchronization, and Interprocess communication in solving computing problems Apply
- CO 3: Describe deadlock conditions and strategies for detection, prevention, avoidance, and recovery Understand
- CO 4: Utilize memory management techniques such as paging, segmentation, and memory-mapped files to manage and evaluate system memory effectively Apply
- CO 5: Implement file system and storage management mechanisms, including disk scheduling, RAID, and virtualization concepts Apply

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 1    | 1    |
| CO 2       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 1    |
| CO 3       | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | 1    | 1    |
| CO 4       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 5       | 3   | 2   | 1   | 1   | -   | -   | -   | -   | -   | -    | 1    | 2    | 2    |

## SYLLABUS:

## UNIT I: OPERATING SYSTEM OVERVIEW

6 + 6

Overview of Computer System – Memory Hierarchy – Cache Memory – Interrupts – Operating system overview – Objectives and functions – Evolution of Operating Systems – Architecture of Operating System: Monolithic, Layered, Microkernel, Modular – System Calls – System Programs – System Boot

## UNIT II: PROCESS MANAGEMENT

6 + 6

Process concepts – Process Control Block (PCB) – Process lifecycle – Process scheduling and CPU scheduling algorithms – Threads and multithreading – Interprocess Communication (IPC) – Process synchronization and mutual exclusion – Classical synchronization problems – Synchronization mechanisms

**UNIT III: DEADLOCK MANAGEMENT**

6 + 6

Principles of Deadlock – Necessary conditions – Deadlock Detection – Resource allocation Graph – Deadlock Avoidance – Banker's algorithm – Deadlock Prevention – Deadlock Recovery – Real - world Case Study: Deadlock in Databases, Distributed Systems

**UNIT IV: MEMORY MANAGEMENT**

6 + 6

Main Memory – Contiguous Allocation – Fixed Partitioning – Swapping – Virtual Memory – Paging – Segmentation – Demand Paging – Page Replacement Algorithms – Modern Memory Concepts: Thrashing and Working Set Model – Memory-mapped Files

**UNIT V: STORAGE MANAGEMENT**

6 + 6

File System Structure – Allocation Methods – Free Space Management – Disk Structure – Disk Scheduling Algorithms – Swap Space Management – Modern Storage: SSDs vs HDD, RAID levels – Introduction to Virtualization: Virtual Machines and Hypervisors

**LIST OF EXPERIMENTS**

1. Introduction to UNIX Commands and Shell Programming
2. Implementation of Process Creation and Management using System Calls
3. Simulation of CPU Scheduling Algorithms (FCFS, SJF, Round Robin)
4. Implementation of Interprocess Communication using Pipes or Shared Memory
5. Process Synchronization using Semaphores (Producer–Consumer Problem)
6. Simulation of Deadlock Avoidance using Banker's Algorithm
7. Implementation of Page Replacement Algorithms (FIFO, LRU)

**CONTACT PERIODS:**

**Lecture:** 30 Periods      **Tutorial:** - Periods      **Practical:** 30 Periods      **Project:** - Periods      **Total:** 60 Periods

**TEXTBOOKS:**

1. Abraham Silberschatz, Peter Baer Galvin and Greg Gagne, "Operating System Concepts", 10th edition, John Wiley and Sons Inc., 2021

## SEMESTER IV

| U25IT402 | Web Engineering | Category: PCC |   |   |   |   |
|----------|-----------------|---------------|---|---|---|---|
|          |                 | L             | T | P | J | C |
|          |                 | 3             | 0 | 0 | 0 | 3 |

## COURSE OBJECTIVES:

- Design full-stack web apps with React front-end and structured architecture
- Build dynamic back-end APIs using Node.js, Express, and MongoDB
- Apply deployment, testing, and DevOps for complete web solutions

## COURSE OUTCOMES:

|       |                                                                                                 |            |
|-------|-------------------------------------------------------------------------------------------------|------------|
| CO 1: | Demonstrate knowledge of web architecture, client-server interaction, and core web technologies | Understand |
| CO 2: | Design and develop front-end applications using React and TypeScript                            | Apply      |
| CO 3: | Develop back-end RESTful APIs using Node.js and Express                                         | Apply      |
| CO 4: | Implement MongoDB for database management, CRUD operations, and authentication                  | Apply      |
| CO 5: | Integrate deployment, testing, and DevOps practices in full-stack applications                  | Apply      |

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|

| CO 3       | 3   | 2   | 1   | -   | -   | -   | -   | -   | -   | -    | 1    | 1    | 1    |
| CO 4       | 3   | 2   | 1   | -   | -   | -   | -   | -   | -   | -    | 1    | 1    | 1    |
| CO 5       | 3   | 2   | 1   | -   | -   | -   | -   | -   | -   | -    | 1    | 1    | 1    |

## SYLLABUS:

## UNIT I: BASICS OF FULL STACK DEVELOPMENT

9 + 6

Overview of Web Architecture – Front-End, Back-End, and Full Stack Overview – ES6+ Features (Arrow Functions, Classes, Modules) – Responsive Web Design using HTML5 & CSS3, Tailwindcss – Bootstrap Components: Carouse – Embedding Videos – Bootstrap Grid System – Bootstrap Utilities – Bootstrap Components.

## UNIT II: FRONT-END DEVELOPMENT WITH REACT

9 + 6

Stateful and Stateless components – JSX Syntax – Components and Props – State and Lifecycle – Event Handling – Conditional Rendering- Lists and Keys – Forms and Controlled Components – React Hooks – Routing with React Router DOM – API Integration – Debugging and Best Practices

## UNIT III: BACK-END DEVELOPMENT WITH NODE.JS AND EXPRESS

9 + 6

Node.js Overview and Event Loop – Express Framework and Routing – Middleware Concepts – RESTful API Design Principles – Handling Requests and Responses – Working with JSON Data – CRUD Operations – Connecting with MongoDB using Mongoose – Error Handling – Testing APIs

**UNIT IV: DATABASE AND REAL-TIME INTEGRATION**

9 + 6

MongoDB Data Model and Schema Design – Collections, Documents, and Relationships – CRUD Operations with Mongoose – Schema Validation – User Authentication and Authorization Concepts – Password Hashing and JWT Overview – Role-Based Access Control – Secure API Practices – Front-End and Back-End Integration – CloudAtlas.

**UNIT V: DEPLOYMENT, TESTING, AND DEVOPS**

9 + 6

Introduction to Software Deployment – Phases of Deployment in Full Stack Applications – Version Control Systems – Branching, Merging, and Pull Requests – CI/CD Concepts – DevOps Culture and Automation Overview – Testing Types (Unit, Integration, E2E) – Application Performance and Optimization Concepts.

**CONTACT PERIODS:**

## SEMESTER IV

| U25IT403 | Fundamentals of Data Communication Laboratory | Category: ESC |   |   |   |   |
|----------|-----------------------------------------------|---------------|---|---|---|---|
|          |                                               | L             | T | P | J | C |
|          |                                               | 0             | 0 | 2 | 0 | 1 |

## COURSE OBJECTIVES:

- To implement and simulate different data transmission modes and network topologies using networking tools without configuration errors.
- To implement line encoding, modulation, multiplexing, and error control techniques for reliable data communication.
- To analyze switching performance, data compression, and basic cryptographic techniques for efficient and secure network communication.

## COURSE OUTCOMES:

- CO 1: Implement and simulate different data transmission modes and network topologies using networking tools. Apply
- CO 2: Implement line encoding schemes and digital/analog modulation techniques for efficient data communication. Apply
- CO 3: Examine the effectiveness of Hamming Code and BCH Code techniques in reliable data communication. Analyze
- CO 4: Compare the operation of FDM, TDM, and CDM techniques for efficient data transmission. Analyze
- CO 5: Investigate switching network performance metrics, lossless data compression methods, and cryptographic techniques for secure communication. Analyze

## CO - PO MAPPING:

| Particular | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO 1       | 3   | 2   | 1   | 1   | 3   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 2       | 3   | 2   | 1   | 1   | 2   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 3       | 3   | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 4       | 3   | 3   | 2   | 2   | 2   | -   | -   | -   | -   | -    | 1    | 2    | 2    |
| CO 5       | 3   | 3   | 2   | 2   | 2   | -   | -   | -   | -   | -    | 1    | 2    | 2    |

## LIST OF EXPERIMENTS

- Study and Simulation of Data Transmission Modes
- Simulation of Network Topologies
- Implementation of Line Encoding Schemes
- Simulation of Digital and Analog Modulation Techniques
- Implementation of Hamming Code for Error Correction
- Implementation of BCH Codes for Error detection and Correction
- Simulation of Multiplexing Techniques (FDM, TDM, CDM)
- Simulation and Analysis of Switching Network Performance Metrics.
- Implementation of Lossless Data Compression Algorithms
- Implementation of Basic Cryptographic Techniques

## LIST OF PROJECTS

1. Develop and design a responsive web application using TailwindCSS and a basic React interface with multiple components and props.
2. Develop and design a React form to capture and validate user input and implement client-side routing using React Router.
3. Develop and design a Node.js and Express server to handle HTTP requests and implement a RESTful API supporting full CRUD operations.
4. Develop and design the connection of an Express application to MongoDB using Mongoose and a complete user authentication system using JWT and bcrypt.
5. Develop and design the integration of a React front-end with a Node.js back-end and implement form validation with error handling on both client and server sides.
6. Develop a full-stack MERN application with user login and CRUD operations.
7. Design and implement a React-Express-MongoDB system for managing student records.
8. Develop a task management web app integrating React front-end, Node.js API, and MongoDB.
9. Build a product inventory application using React UI, Express REST API, and MongoDB database.
10. Develop and deploy a mini e-commerce cart system using React, Express, and MongoDB.

## GUIDLINES:

- Certifications and Skill Credentials - Free awareness certs, NPTEL/Coursera, Associate-level, Professional-level, Expert-level
- Competitions, Hackathons, and Technical Challenges - Online, institution, state, national, international competitions and hackathons, Kaggle medals
- GATE Preparation and Performance - Study plan, mock tests, registration, appearing, score percentile
- Academic, Industry, and Innovation Projects - Mini-projects, intermediate projects, industry-grade deployed projects, funded or published projects
- Internships and Industrial Training - Virtual, on-site short, core role, CoE on-campus, PPO, PPO converted to offer
- Research Publications, Patents, Intellectual Property - Reading journals, survey papers, conference papers, Scopus/WoS, Q1/Q2 journals, patents from provisional to granted
- Leadership, Community, Digital Presence - Club membership, event roles, office bearer, president, outreach, LinkedIn, GitHub, portfolio, Google Scholar
