# Outcome

The National Level Online Quiz event organized by the Department of Civil Engineering at KPR Institute of Engineering and Technology in association with ICI Student Chapter Coimbatore was a great success. The event attracted a lot of interest from civil engineering students and professionals from various institutes, with 53 participants registering for the quiz. The quiz covered various topics related to civil engineering, including construction materials, structural design, surveying, transportation engineering, and more. Participants had the opportunity to compete with like-minded individuals and showcase their expertise in the field. The online format of the event allowed for participation from anywhere, making it accessible to a wider audience. The event was a fun-filled and intellectually stimulating quiz that helped participants test their knowledge in civil engineering. Overall, the event was a great success and helped to promote the importance of civil engineering education and awareness. It provided a platform for participants to learn, compete, and showcase their skills. The event organizers should be commended for their efforts in organizing such a successful event.

## **Event Summary**

The second edition of the National Level Online Quiz series, organized by the Department of Civil Engineering at KPR Institute of Engineering and Technology in association with ICI Student Chapter Coimbatore, was a resounding success. Held on May 15, 2023, this event aimed at the core principles of civil engineering while assessing the participants' knowledge in the field. The quiz encompassed a wide range of topics including construction materials, structural design, surveying, transportation engineering, and more.

53 students from various educational institutes enthusiastically participated in this intellectually stimulating event. By bringing together like-minded individuals, the quiz provided an excellent platform for participants to demonstrate their expertise and engage in healthy competition. As an online event, it eliminated geographical barriers, enabling individuals from anywhere to take part and benefit from the knowledge shared. The event attracted not only students but also engineers and individuals passionate about civil engineering. The quiz was meticulously designed to be both intellectually stimulating and enjoyable. The questions posed were challenging, putting the participants' understanding of different aspects of civil engineering to the test. Participants were required to provide answers in a multiple-choice format, adding excitement and healthy competition. At the end of the quiz, the top scorers were recognized as winners and awarded certificates for their outstanding performance.

The event was conducted professionally and received highly positive feedback from the participants. They expressed satisfaction with the organization and execution of the event, highlighting the value it brought to their learning experience. By providing an engaging and competitive platform for participants to showcase their civil engineering expertise, the event left a lasting impression on everyone involved. The positive feedback received from the participants further reinforced the impact and importance of such knowledge-sharing initiatives.

With the success of this event, the organizers are motivated to continue conducting similar events in the future, fostering a culture of learning and exploration in civil engineering.
